HUDSON BEAT

SAMPLE FLIPPING

Chop. Pitch. Flip.

DIGITAL MUSIC PRODUCTION 2 · CLASS 1 · CHOP, PITCH AND FLIP IN LOGIC PRO

LISTEN: BEFORE AND AFTER

YOUR OWN CLEARED SAMPLE, PLAYED TWICE

Teacher: play the raw sample, then your 30-second flip.

- What did I do to it?
- Which tiny piece did I use again and again?
- Could you hear the original inside the new track?

WHAT THE HECK IS FLIPPING?

- Taking a sample and making something new from it
- Chop it into pieces
- Pitch it, reverse it, stretch it
- Rearrange the pieces and build around them

SEVEN CLASSES

CLASS 1	Before and after · what flipping is · ethics · choose a sample
CLASS 2	Slice it · the three modes · flip it · drums that fit
CLASS 3	Working day: build your beat
CLASS 4	Working day: layer and arrange
CLASS 5	Working day: refine
CLASS 6	Mix and bounce · checklist · rubric · 3 questions
CLASS 7	Presentations with Padlet Q&A

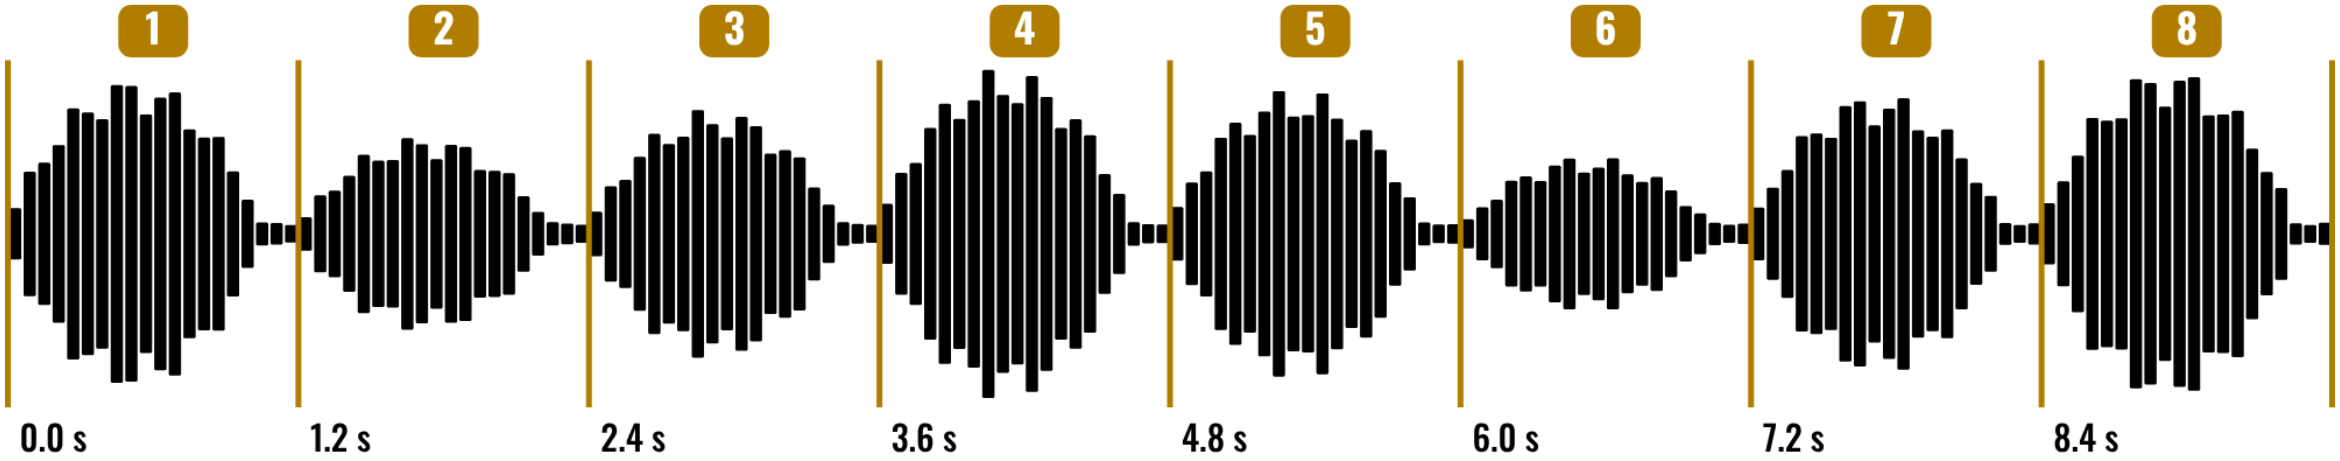

SAMPLING: ART AND ETHICS

- Producers have always built new music from old sounds
- Whose sound is it?
- Is it cleared, public domain, or yours?
- Our samples are cleared for this class
- Write down where your sample came from

STEP 1: LISTEN AND CHOOSE

1. Browse the provided samples
2. Listen with headphones, more than once
3. Note the key and tempo from the file name
4. Pick one you can hear a use for
5. Fill in the Sample log

WORKED EXAMPLE: SLICE A SAMPLE

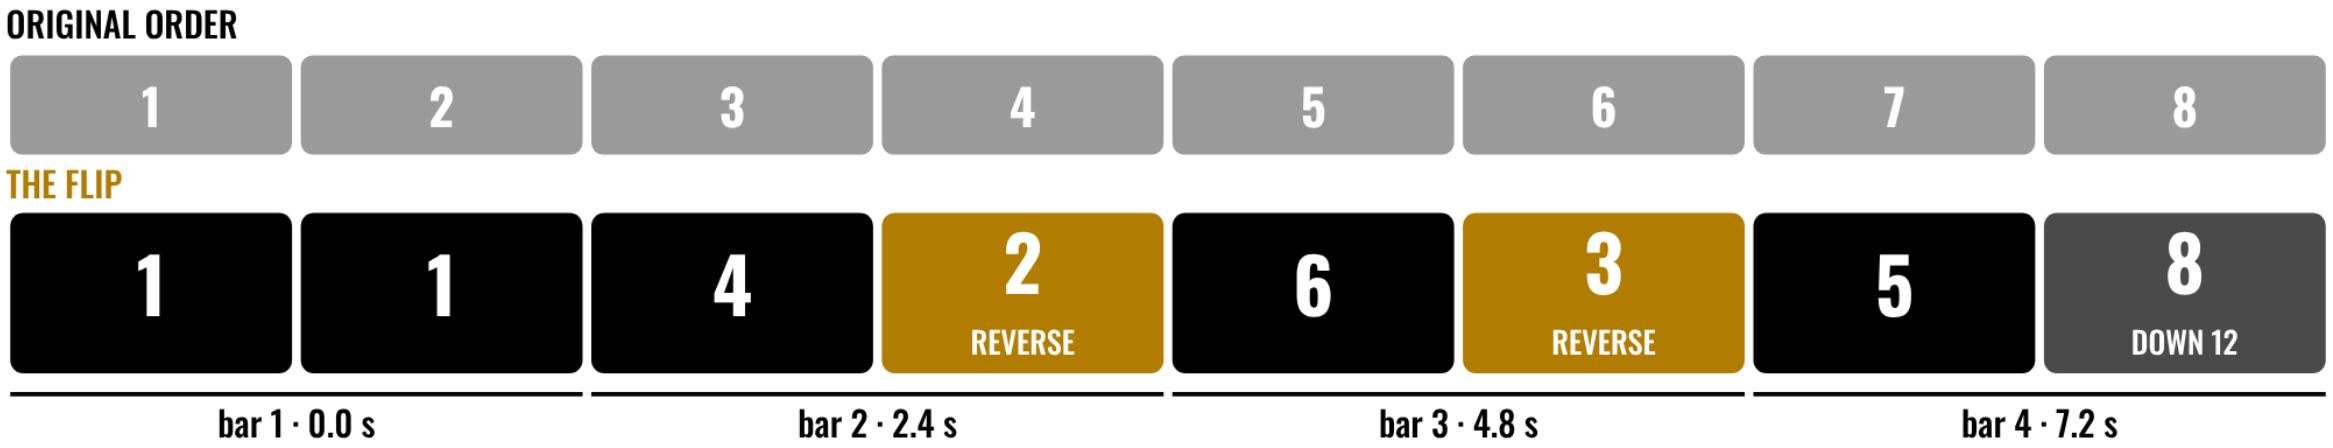

- 8 slices of 1.2 s
- Each slice = 2 beats
- 9.6 s = 4 bars at 100 BPM
- Cut at the start of a sound

WATCH ME: THE THREE MODES

1. Classic: the sample plays across the keys, pitch follows the key
2. One Shot: a key plays the whole sample
3. Slice: the sample is cut up, one slice per key
4. Drop in a sample, try all three
5. Reverse, pitch, then play it

WORKED EXAMPLE: FLIP IT

- 8 slots of 2 beats, 4 bars
- Slice 8 down an octave
- Reverse slices 2 and 3
- Same slices, new order

WATCH ME: DRUMS THAT FIT

1. New track: an Electronic Drum Kit (Drum Machine Designer)
2. Pattern region, Step Sequencer
3. Kick, snare, hi-hat: leave space for the chops
4. Match the style the flip is heading toward
5. Vary the velocity

BUILD YOUR BEAT

- Program your own drum pattern
- Match the style of your flip
- Play the chops on the keys, record them
- Keep the best take

LAYER AND ARRANGE

- Bass, chords, melodies and extras
- Keep it appropriate to the style
- Give the track a beginning, a middle and an end
- Put each sound on its own track

MIX AND BOUNCE

- EQ every track
- Pan and balance everything
- Bounce a .mp3 or .wav
- Zip the .logicx project

WHAT YOU TURN IN

- [ ] Bounced .mp3 or .wav uploaded
- [ ] Zipped .logicx project uploaded
- [ ] Named: Your Name – Sample Flipping
- [ ] Padlet post with your 3 questions
- [ ] Answer 2 questions on classmates' posts

HOW IT'S SCORED

CREATIVITY & ORIGINALITY	5 = Exceptional creativity; innovative, bold, and expressive	/ 5
TECHNICAL SKILL / DAW USE	5 = Expert-level command of multiple Logic systems	/ 5
COMPOSITION & STRUCTURE	5 = Professional pacing, flow, and musical arc	/ 5
SOUND DESIGN & MIX QUALITY	5 = Exceptional sound design; professional-quality mix	/ 5
DOCUMENTATION & PRESENTATION	5 = Exceptional; thorough insight and polished delivery	/ 5

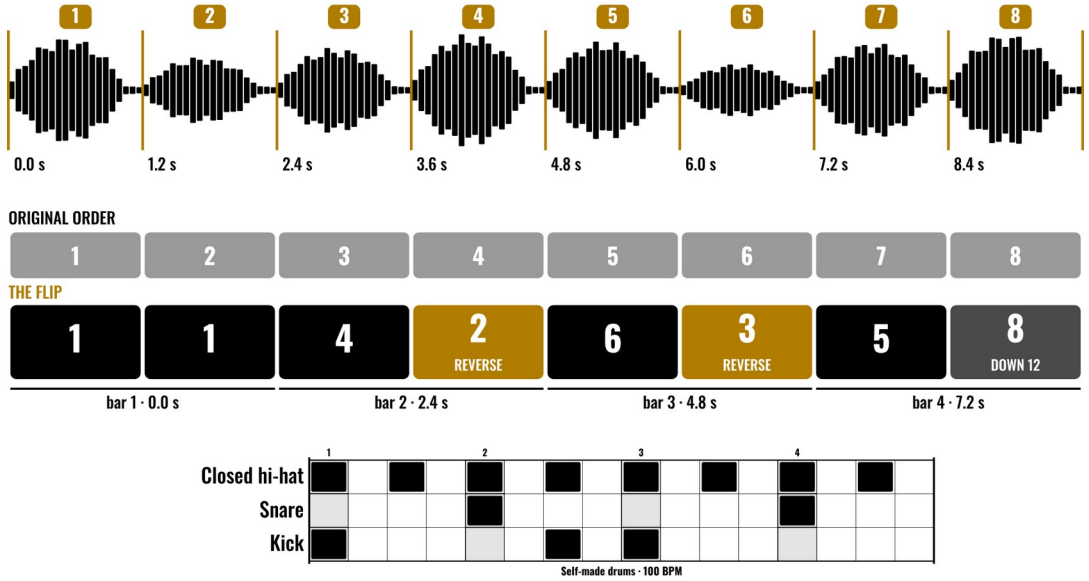

SCORED 1–5 · FINAL GRADE = AVERAGE OF YOUR SCORE AND MINE · / 25

PRESENTATION DAY

- Play the raw sample, then your track
- Your Padlet post: 3 questions about your project
- Answer at least 2 of each classmate’s 3
- Listen like a producer: what did they do to it?

ONE LAST THING...

- You started with one sample.
- You chopped it and flipped it.
- You built the drums yourself.
- Now it's yours.

REFLECTION · PAGE 21

Write it or talk it through: what went well, what was hard, what you would change.
