RECREATE A HIT IN LOGIC PRO

BILLBOARD TOP 10

DMP2 · song form · tempo · drum programming · mixing · intro slides

GRADES 9–12 · 7 CLASS PERIODS · 20 PAGES + 17-SLIDE DECK

BILLBOARD TOP 10

How to use this resource

START HERE

Teacher

WHAT THIS IS ·

A 7-class-period project for high school music technology. Students study the current Billboard Top 10, pick one song and recreate it in Logic Pro: the same tempo, the exact song form, drums they program themselves, instruments that fit the genre, and a mix with EQ and plug-ins. It is a structured project from my Digital Music Production 2 course (focus: song form and drums), and the projects in that course can be taught in any order.

QUICK START ·

1. Read the pacing guide (page 5) and my teacher notes (pages 6–7).
2. Check this week's Top 10 on billboard.com and preview the songs (page 4).
3. Print the student pages (pages 11–19), one set per student.
4. Open the intro deck and read the speaker notes for Class 1.

THE INTRO DECK ·

Every slide has a class: Class 1 (slides 1–6), Class 2 (slides 7–10), Class 3 (slide 11), Class 4 (slide 12), Class 6 (slides 13–15) and Class 7 (slides 16–17). Class 5 is a working day with no new slide. Every slide has speaker notes.

Fonts: the deck uses Oswald and Source Sans 3 (free on Google Fonts, built into Google Slides). If PowerPoint or Keynote shows a different font, install the two fonts or present the PDF copy, which shows the intended look.

WHAT'S INSIDE ·

PART	PAGES	USE
Teacher pages	pages 2–10	How to use, overview, setup, pacing, teacher notes, what changed, Logic reference, worked example
Student pages	pages 11–19	Top 10 analysis, Song Form map, drum patterns, project sheet (3 pages), rubric, vocabulary, feedback planner
Intro deck (separate file)	deck	17 slides, .pptx + PDF, speaker notes on every slide

NO SONGS INCLUDED

No songs, audio, video, lyrics or chart data are included. Students choose from the current chart on billboard.com and listen on YouTube or Spotify through your school's own access.

MAKE IT FIT YOUR CLASS ·

- **The chart changes every week.** Use the Top 10 of the week you start; students keep their song even if it drops.
- **Song choice:** preview the ten songs and point students to clean versions, or offer an approved list.
- **Shorter or harder:** my variations on page 6.
- **Feedback board:** my sheets use Padlet for the three questions; any class board works.
- **Grading:** my rubric, /25, the average of the student's and your score (page 17).

Billboard and Hot 100 are trademarks of their owner, named only to describe the chart students listen to; this resource is not affiliated with or endorsed by Billboard.

BILLBOARD TOP 10

Project overview

OVERVIEW

DMP2 · Structured

FROM MY DMP2 PROJECT MENU

Billboard Top 10 · Structured · Song Form & Drums

Analyze and recreate a current Billboard hit. Study song form, production techniques, and drum programming.

WHAT STUDENTS MAKE ·

One Logic Pro project: their own version of a song from the current Billboard Top 10, at the original tempo and in the original song form, with Arrangement Markers for every section, drum patterns they programmed themselves, instruments and layers that fit the genre, and EQ, panning and plug-ins. They hand in a bounced .mp3 or .wav, the zipped .logicx project, the Top 10 analysis, and a Padlet post with three feedback questions.

WHAT THIS PROJECT REINFORCES ·

This builds directly on song form, drum programming, and arrangement skills. The emulation approach forces precision with tempo, form, and instrumentation while still requiring creative production choices. It teaches students to listen analytically rather than passively.

STANDARDS ·

Supports the National Core Arts Standards for Music (Music Technology, high school): analyzing how musical works are structured (MU:Re7.2), developing and refining work (MU:Cr2.1, MU:Cr3.1) and presenting it (MU:Pr6.1).

GOALS ·

- Analyze song form, structure, and arrangement in commercial music
- Develop drum programming skills by recreating real-world patterns
- Practice matching tempo, key, and instrumentation to a reference track
- Strengthen mixing and production techniques through style emulation

AT A GLANCE ·

Grades	9–12: the second-year course, after a first year of Logic Pro basics
Length	7 class periods: explore and map, drums, three working days, mix, present
Software	Logic Pro: tempo and metronome, Arrangement Markers, Drum Machine Designer and the Step Sequencer, Channel EQ, pan, bounce
You supply	Access to the current chart and the songs (YouTube or Spotify), headphones, a feedback board
Assessment	My rubric, 5 categories scored 1–5, /25; final grade = average of the student's and the teacher's score (page 17)

BEFORE THEY START

Students should already know how to make a drum pattern, play in parts and save, bounce and zip a project in Logic. The Logic quick reference (page 9) covers every tool this project uses.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

BILLBOARD TOP 10

Setup and requirements

SETUP

Teacher

YOU NEED ·

- **A Mac with Logic Pro** for each student (a current version: the Step Sequencer and pattern regions came in Logic Pro X 10.5), and **headphones**.
- **The current chart**: the Billboard Hot 100 on billboard.com, top 10 songs.
- **A way to play the songs**: YouTube or Spotify through your school's own access. Nothing is included.
- **A place to submit** an .mp3 or .wav and a zipped .logicx project (your class page).
- **A feedback board** for the three questions (my sheets use Padlet).
- **Printed student pages**, one set each (pages 11–19).

A MIDI KEYBOARD? ·

Helpful for bass, chords and melodies, not required: notes can be drawn in the Piano Roll.

BEFORE CLASS 1 ·

- [ ] Open this week's Hot 100 and list the top 10 songs.
- [ ] Preview all ten. Note clean versions, or make an approved list for your school.
- [ ] Note which songs have clear, easy-to-hear sections (my first common struggle).
- [ ] Test the class speakers; cue up the No. 1 for slide 2.
- [ ] Print the student pages; set up the submission spot and the feedback board.

BEFORE CLASS 2 ·

- [ ] Skim every Song Form map: sections, bar counts, start times.
- [ ] Have the worked example (page 10) ready for the tempo and drums demos.

SONGS THAT WORK WELL

- Clear, identifiable sections: you can hear where the chorus starts
- A steady beat you can count, and drums you can pick out
- A clean version your school is comfortable with

SONGS THAT WILL BE HARD

- Heavily layered pop or hip-hop with 50+ tracks (my teacher notes)
- Tempo changes, or long sections with no beat
- If a student insists: the easier variation, the first 1–2 minutes

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

BILLBOARD TOP 10

Pacing guide · 7 class periods

PACING

Teacher

7 class periods, as on my project menu. The “My plan” column is my day-by-day pacing guide as I wrote it; the other columns show what to put on the screen and in students’ hands.

CLASS	MY PLAN	TEACHER MOVES	DECK	STUDENT PAGES
CLASS 1	**Class 1:** Explore Billboard Top 10, complete the Top 10 analysis. Begin song form analysis.	Slides 1–6: hook, listen to the No. 1, what emulation is, the seven classes, the Top 10 and song form. Hand out the project sheet and the Top 10 analysis.	Slides 1–6	p. 11, p. 14, p. 15, p. 16, p. 18
CLASS 2	**Class 2:** Finish song form mapping. Analyze drum patterns and begin programming in Logic.	Slides 7–10: a mapped song, tempo and markers demo, the drums broken down, drum demo. Check every Song Form map before students open Logic.	Slides 7–10	p. 12, p. 13
CLASS 3	**Classes 3–5:** Working days — build tracks, layer instruments, refine arrangement.	Slide 11: build your foundation (bass, chords, core instruments). Then work time; circulate.	Slide 11	—
CLASS 4		Slide 12: add layers (melodies, pads, FX, transitions). Then work time.	Slide 12	—
CLASS 5		Full working day: refine the arrangement against the original, section by section.	No new slides	—
CLASS 6	**Class 6:** Final mix and bounce. Prepare presentations and write 3 Padlet feedback questions.	Slides 13–15: mix and refine, what you turn in, the rubric. Students self-score, bounce and post their questions.	Slides 13–15	p. 17, p. 19
CLASS 7	**Class 7:** Presentations with Padlet Q&A peer feedback.	Slides 16–17: presentation day and the close. Every student presents and answers 2 of each classmate’s questions.	Slides 16–17	p. 19

THE ONE RULE FOR CLASS 2

From my common struggles: students skip counting bars. Require the Song Form map (page 12) before they open Logic. Slides 7 and 8 model it.

CLASSES 3–5

Working days. Slides 11 and 12 open Classes 3 and 4; Class 5 has no new slide. Circulate with each student’s Song Form map and ask: which section are you building, and does it match the original’s energy?

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

WHAT THIS PROJECT REINFORCES ·

This builds directly on song form, drum programming, and arrangement skills. The emulation approach forces precision with tempo, form, and instrumentation while still requiring creative production choices. It teaches students to listen analytically rather than passively.

COMMON STUDENT STRUGGLES ·

- Students pick songs that are too complex (heavily layered pop or hip-hop with 50+ tracks). Guide them toward songs with clear, identifiable sections.
- Song form analysis is rushed or inaccurate — students skip counting bars. Require the Song Form map (page 12) before they open Logic.
- Drum programming feels robotic. Encourage velocity variation and subtle timing adjustments to add human feel.
- Students copy the arrangement but ignore the mix — the EQ and panning step often gets skipped.

SUGGESTED VARIATIONS ·

Easier: Allow students to recreate only the first 1–2 minutes of the song, or provide a pre-built drum pattern they can modify.

More Advanced: Require students to add an original 8-bar section (bridge, outro, or remix) that fits the style but is entirely their own.

WHERE THIS KIT HELPS WITH EACH STRUGGLE

- Songs that are too complex: “Songs that work well” on page 4, and the “Clear sections?” column of the Top 10 analysis (page 11).
- Skipped bar counts: the Song Form map (page 12) has a bar column and a length check.
- Robotic drums: the velocity lane in the worked example (page 10) and slide 9.
- A skipped mix: slide 13 puts EQ, pan, levels and plug-ins on the screen in Class 6.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

SUGGESTED RESOURCES ·

MY LIST	IN THIS KIT
Google Form for Billboard analysis (link on your class page)	The Top 10 analysis, page 11 (a printed version; my Google Form is not included).
Song Form spreadsheet — *Sorry* by Justin Bieber example	The Song Form map, page 12, and the worked example on page 10. My spreadsheet is not included; you can map the song with the class from your own YouTube or Spotify access.
Drum Pattern analysis spreadsheet for reference	Drum pattern analysis, page 13, with worked grids on page 10.
Billboard Hot 100 website for current chart	billboard.com (the Hot 100 chart). Check the current Top 10 before Class 1 (page 4).

HOW TO GRADE ·

- My rubric: five categories, each scored 1–5, /25 (page 17). Students score themselves first; the final grade is the average of their score and yours.

Suggestions from this kit, not part of my rubric:

- Composition & Structure: hold the student's Song Form map next to their Arrangement Markers. Do the sections, bar counts and tempo match the original?
- Technical Skill: are the drums programmed by the student (percussion loops only as accents), with some velocity variation?
- Sound Design & Mix: solo a few tracks. Is there EQ on every track, panning for width, and nothing clipping on the loudest section?

NOTES / OBSERVATIONS ·

This project works well early when students need structure. The Top 10 analysis and the song form and drum pattern pages front-load the analytical work.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

BILLBOARD TOP 10

What changed from the original

CHANGES

Teacher

This kit is built from three of my documents: the **Project Sheet & Rubric**, the **Teacher Notes** and the **Billboard Top 10** entry on my DMP2 project menu. This page lists every change to my wording, so you know exactly what is mine and what was added.

WORDING CHANGES ·

- My LMS name is written as “your class page” (checklist items 3 and 4, and the Google Form link in my resource list).
- My Google Form analysis is not included, so step 1, the first checklist item and my Class 1 plan say “the Top 10 analysis” (a printed page, page 11) instead of “the Google Form analysis” / “complete Google Form”.
- My Song Form spreadsheet is not included, so step 2 and the second common struggle say “the Song Form map” (page 12) instead of “the Song Form spreadsheet”.
- Page numbers are added to steps 1–3 (step 3 points to the drum pattern page, page 13).
- My closing note says “The Top 10 analysis and the song form and drum pattern pages front-load the analytical work” instead of “The Google Form and spreadsheets front-load the analytical work”.
- My pacing guide’s “Classes 3–5” row spans the Class 3, 4 and 5 rows, so each class can name its slides.
- Layout only: the rubric’s Name and Date lines moved to the top; its Notes box became ruled lines.
- The intro deck shortens my wording (full wording on pages 14–16): step 6 becomes four short lines on slide 13 (“EQ every track · Pan for width · Adjust levels · Add plug-ins for authenticity”); slides 3, 5, 11, 12 and 14 condense the emulation definition, steps 1, 4 and 5 and the checklist.

KEPT AS I WROTE IT ·

Everything else from my three documents is kept as I wrote it: the overview, goals, vocabulary, requirements, steps, tips, checklist and file name (“Your Name – Billboard Top 10”), the rubric (five categories scored 1–5, /25, the average of the student’s and the teacher’s score), what the project reinforces, the four common struggles, the variations, my resource list and my day-by-day pacing, and the project menu entry quoted on page 3. No requirement or rubric row is added.

NEW IN THIS KIT ·

Everything else is new and supports my sheets without changing them: how to use the kit, the overview and setup pages, the teacher moves and slide numbers in the pacing guide, the grading suggestions, the Logic quick reference, the worked example (an original practice map, not a real song), the Top 10 analysis, the Song Form map and the drum pattern pages, the vocabulary page, the presentation planner and the intro deck. None of these adds a requirement or a rubric row.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

BILLBOARD TOP 10

Logic quick reference

SETUP

Teacher + student

Everything students need in Logic for this project, in one table. Demonstrate the tempo and markers (slide 8) and the drums (slide 10), then let students work.

Tempo	Count the song's beats for 15 seconds and multiply by 4. Double-click the tempo in the control bar and type it in. Turn on the metronome (K) and play the song alongside it: if the click drifts, adjust by 1 BPM.
Arrangement Markers	Turn on Global Tracks (G). In the Arrangement track, click + to add a marker, drag its edges to fit the section's bars, and rename it (Intro, Verse 1, Chorus…).
Drum track	Track › New Software Instrument Track; in the Library (Y) choose a kit under Electronic Drum Kit. This loads Drum Machine Designer.
Pattern region	Control-click in the drum track at a marker and choose Create Pattern Region. Double-click it to open the Step Sequencer; click steps to turn hits on.
Velocity	In the Step Sequencer, switch the edit mode to Velocity and drag hits up or down; in the Piano Roll, select notes and use the Velocity slider.
Copy a section	Option-drag a region to copy it, or select it and press Command-R to repeat it.
EQ and pan	Open the Mixer (X). Double-click the EQ display at the top of a channel strip to open Channel EQ; turn the Pan knob to place the track left or right.
Percussion accents	Loop Browser (O): percussion Apple Loops are allowed as accents only; the main drum patterns are programmed by the student.
Bounce and zip	File › Bounce › Project or Section (Command-B), MP3 or WAV. In Finder, Control-click the .logicx project and choose Compress.

VERSION NOTE

Menu names are from current Logic Pro versions; older versions may differ slightly. Logic Pro is a trademark of Apple Inc., named only to describe what the project needs. This resource is not affiliated with Apple.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

BILLBOARD TOP 10

EXAMPLE

Worked example · a practice map

Teacher

An **original practice map, not a real song**, so you can model each step with numbers that are easy to check. Students' maps come from their own song.

1 · TEMPO

Count the beats for 15 seconds: 25 beats × 4 = **100 BPM**. One bar of 4/4 lasts 240 ÷ 100 = 2.4 seconds.

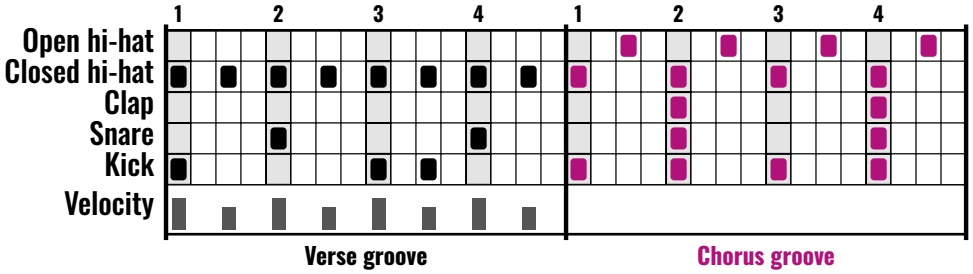

2 · SONG FORM ·

SECTION	BARS	LENGTH	STARTS	WHAT'S HAPPENING
Intro	1–4	4	0:00	Chords and a pad, no drums
Verse 1	5–20	16	0:10	Drums (verse groove), bass, chords; vocal melody
Chorus	21–28	8	0:48	Full drums (chorus groove), bass, chords, pad, lead synth
Verse 2	29–44	16	1:07	Drums (verse groove), bass, chords; vocal melody
Chorus	45–52	8	1:46	Full drums (chorus groove), bass, chords, pad, lead synth
Bridge	53–60	8	2:05	Drums drop to kick only; pad and bass
Chorus	61–68	8	2:24	Full drums (chorus groove), bass, chords, pad, lead synth
Outro	69–72	4	2:43	Chords ring out; no drums

4 + 16 + 8 + 16 + 8 + 8 + 8 + 4 = 72 bars × 2.4 s = 172.8 s (2:53). Start time = (bar − 1) × 2.4 s, rounded. Bars in the white meter on each block: how full the section is (1–4).

3 · DRUMS (X = A HIT, . = A REST, 16 STEPS PER BAR) ·

SOUND	VERSE GROOVE	CHORUS GROOVE
Open hi-hat	—	`..x...x...x...x.`
Closed hi-hat	`x.x.x.x.x.x.x.x.`	`x...x...x...x...`
Clap	—	`....x.......x...`
Snare	`....x.......x...`	`....x.......x...`
Kick	`x.......x.x.....`	`x...x...x...x...`

Velocity: verse hi-hats 100 on the beat, 72 between (of 127). The bridge keeps only the verse kick; the intro and outro have no drums.

Name _____ Date _____

BILLBOARD TOP 10

Digital Music Production | *Structured Project* | 7 class periods

OVERVIEW ·

Your job is to study the current Billboard Top 10, pick one song, and recreate it in Logic Pro. You're not just copying — you're reverse-engineering what makes a hit song work. You'll analyze song form, drum patterns, instrumentation, and production techniques, then build your own version from scratch.

GOALS ·

- Analyze song form, structure, and arrangement in commercial music
- Develop drum programming skills by recreating real-world patterns
- Practice matching tempo, key, and instrumentation to a reference track
- Strengthen mixing and production techniques through style emulation

KEY VOCABULARY ·

Song Form	The structure of a song — how sections like intro, verse, chorus, and bridge are organized
Tempo	The speed of a song, measured in BPM (beats per minute)
Drum Pattern	A repeating rhythmic figure played by the kick, snare, and hi-hat that defines the groove
Emulation	Recreating the style and sound of an existing track as closely as possible
Arrangement Markers	Logic's tool for labeling and organizing song sections on the timeline

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

BILLBOARD TOP 10

Project sheet · requirements and steps

STUDENT

Name _____ Date _____

REQUIREMENTS ·

- ☐ Choose one song from the current Billboard Top 10
- ☐ Match the tempo of your chosen song exactly
- ☐ Recreate the exact song form (intro, verse, chorus, bridge, etc.)
- ☐ Drum patterns must be self-created — percussion loops are okay as accents
- ☐ Use appropriate instruments and layers for the genre
- ☐ Apply EQ and plug-ins to shape your sounds authentically

STEPS / PROCESS ·

1. **Explore the Billboard Top 10** — listen to all 10 songs and complete the Top 10 analysis (page 11)
2. **Study song form** — map out the exact structure of your chosen song using the Song Form map (page 12)
3. **Analyze and program drum patterns** — break down the kick, snare, and hi-hat and build them in Logic (page 13). Set up Arrangement Markers.
4. **Build your foundation** — lay down bass, chords, and core instrumentation to match the original's energy
5. **Add layers** — fill in melodies, pads, FX, and transitions to match the fullness of the original
6. **Mix and refine** — EQ every track, pan for width, adjust levels, and add plug-ins for authenticity
7. **Present & Get Feedback** — Create your own Padlet post with 3 questions you want classmates to answer about your project. Present to the class. During classmates' presentations, answer at least 2 of their 3 questions on their Padlet post.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

BILLBOARD TOP 10

Project sheet · tips and checklist

STUDENT

Name _____ Date _____

TIPS FOR SUCCESS ·

- Listen to your reference track with headphones and really pay attention to what's happening in each section. Count the bars.
- Don't try to perfectly match every single sound — focus on capturing the vibe, structure, and energy.
- Your drums are the backbone. If the beat doesn't feel right, the whole track will feel off.
- Use Logic's Arrangement Markers early to block out your form — it keeps you organized and saves time.

SUBMISSION CHECKLIST ·

- ☐ Top 10 analysis completed
- ☐ Song form mapped out and input into Logic using Arrangement Markers
- ☐ Bounced .mp3 or .wav uploaded to your class page
- ☐ Zipped .logicx project file uploaded to your class page
- ☐ Files named correctly: "Your Name – Billboard Top 10"
- ☐ Padlet post created with your 3 feedback questions
- ☐ Answered at least 2 questions on classmates' Padlet posts during presentations

TERMS OF USE

Thank you for your purchase!

© 2026 Brian Lotze. Hudson Beat by Brian Lotze. All rights reserved. This purchase gives **one teacher** a license to use this resource (the PDF and the intro deck) with their own students.

YOU MAY

- Print and copy pages for your own classroom and students, year after year.
- Present the intro deck to your own classes and edit it for your own teaching.
- Share pages with your own students through a password-protected class site or learning platform.
- Leave the pages for a substitute teacher who teaches your own students.

YOU MAY NOT

- Share, email or copy this resource for other teachers, a whole school or a district. Additional licenses are available on Teachers Pay Teachers.
- Post any part of it on a public website, shared drive or social media.
- Sell, give away or claim any part of it as your own, or edit it into a new product.

QUESTIONS?

Please use the Q&A tab on the Hudson Beat by Brian Lotze store on Teachers Pay Teachers. If something looks wrong, let me know there and I will fix it.
