HUDSON BEAT

PATTERN PRODIGY

Program a groove that evolves.

THINK: A BEAT THAT CHANGES

TAP IT OUT

Think, then share

Teacher: tap a simple beat on a desk, then change one tap each time round. No audio is needed.

- What makes a groove feel like a groove?
- What happens if a machine plays the exact same bar forever?
- How could a machine sound as if a person is playing?

WHAT IS PATTERN PRODIGY?

- Build an original loop-based groove
- Step Sequencer and Pattern Regions
- Probability, velocity and automation
- 30–60 seconds that evolves over time

SEVEN CLASSES

CLASS 1	A beat that changes · the steps · five words · explore and build rhythms
CLASS 2	Read a grid · not only drums · add melodic layers
CLASS 3	Working day: four ways to evolve, worked example
CLASS 4	Working day: probability, mix, refine
CLASS 5	Working day: explore automation, probability, variation
CLASS 6	Bounce · checklist · rubric
CLASS 7	Presentations with Padlet Q&A

FIVE STEPS, THEN FINISH

Then finalize: bounce, present and get feedback

- Explore basic drum patterns
- Add bass and synth patterns
- Build drum and percussion patterns
- Evolve them, then mix and refine

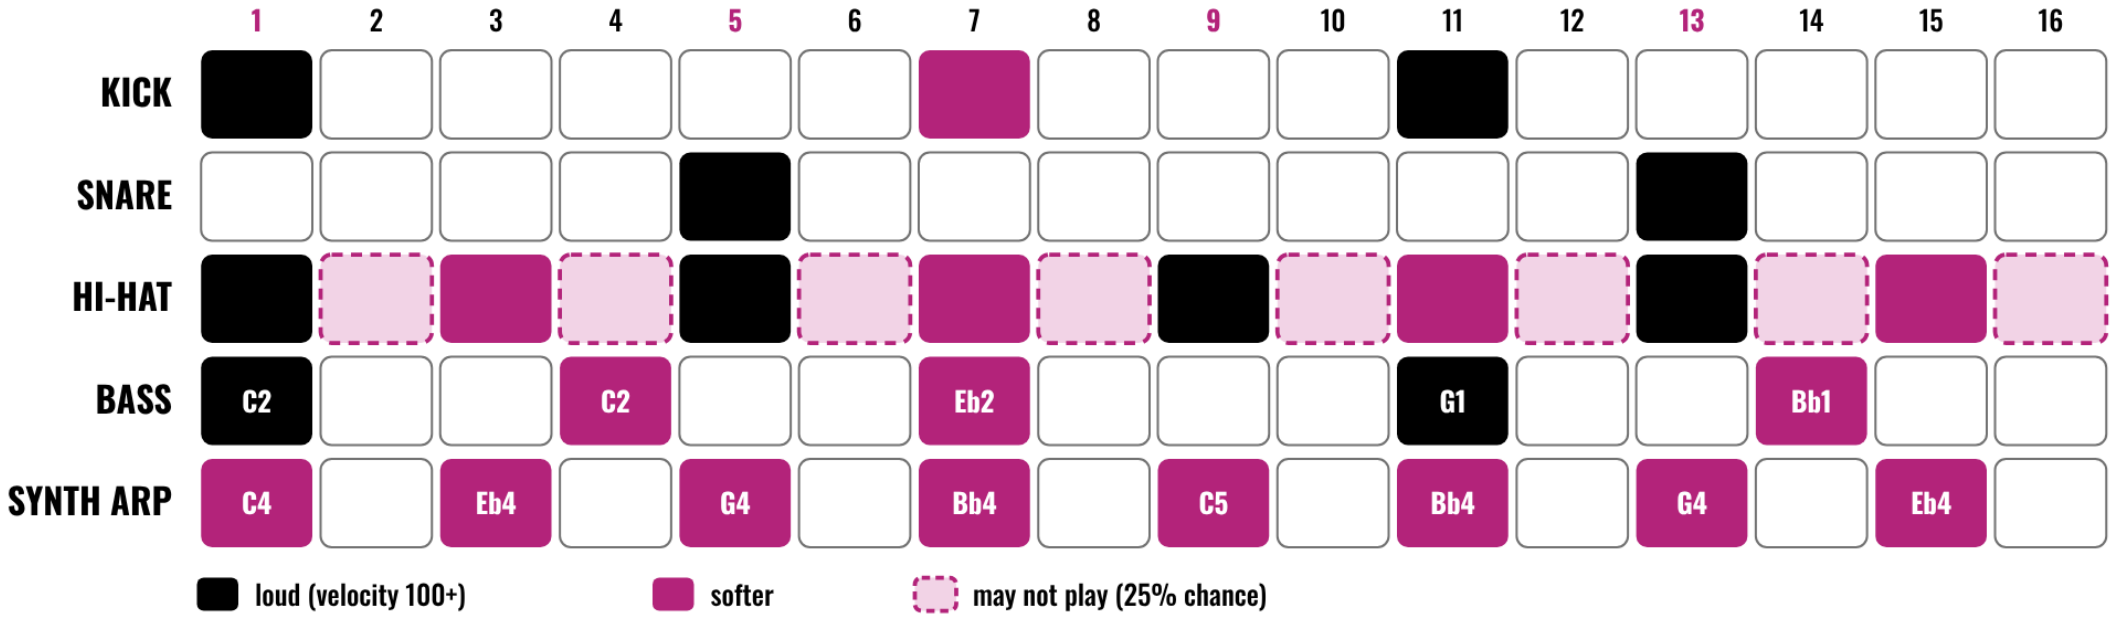

FIVE WORDS TO KNOW

- Step Sequencer: toggle steps on a grid
- Pattern Region: holds sequencer data
- Probability: a chance a step plays
- Velocity: how hard a note is played
- Automation: a parameter changing over time

STEPS 1 AND 2: EXPLORE, BUILD

1. Open the Step Sequencer; try basic drum patterns
2. Click steps on and off, listen, change one thing at a time
3. Create your core drum and percussion patterns
4. Make a groove that feels good first

READING A PATTERN GRID

- One bar, 16 steps
- Dashed steps may not play
- Darker means louder
- Drums, bass and a synth arp

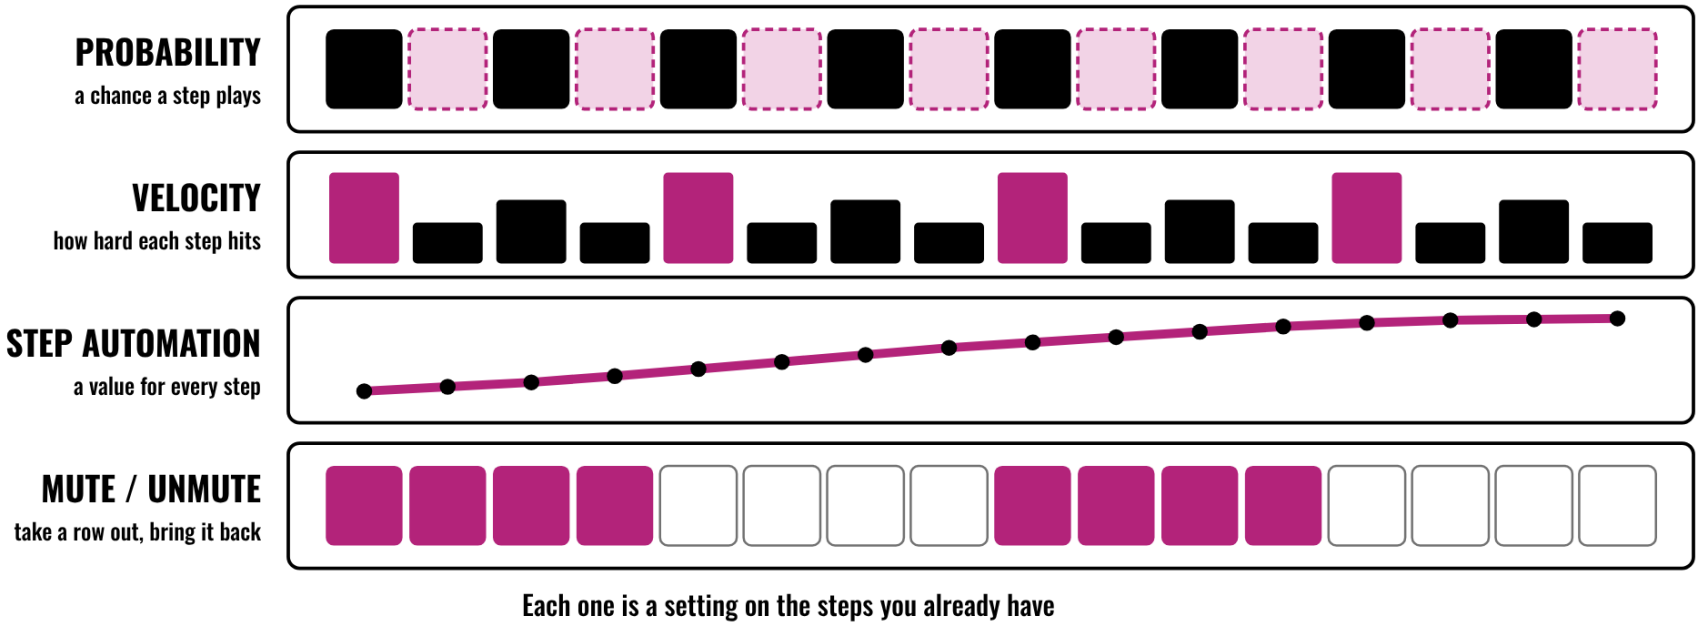

NOT ONLY DRUMS

- The Step Sequencer works for bass and synths too
- Demo a melodic pattern early
- Start with your drums; the rest follows
- Ask: what else could be a row?

STEP 3: ADD MELODIC LAYERS

1. Program bass and synth patterns that complement your groove
2. Include a drum kit, a bass or synth, and one more element
3. Let the bass follow the kick
4. Add one pattern at a time, and listen

FOUR WAYS TO EVOLVE

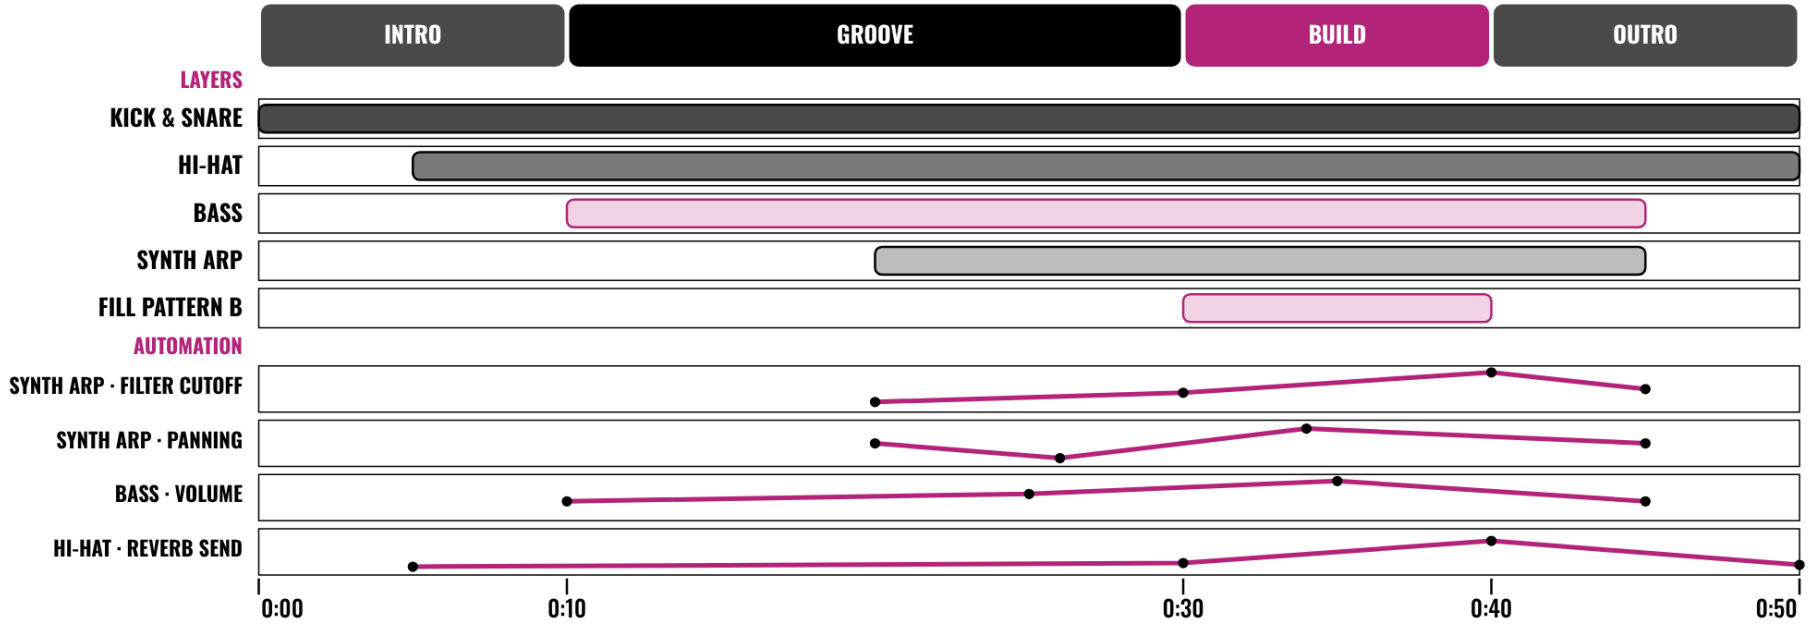

Each one is a setting on the steps you already have

- Probability: a chance to play
- Velocity: how hard
- Step automation: a value per step
- Mute / unmute: arrangement changes

STEP 4: AUTOMATE AND VARY

- Use probability, velocity and automation
- Patterns should evolve, not repeat exactly
- Use at least 3 Step Sequencer features
- Count your features on the tracker

WORKED EXAMPLE: 50 SECONDS

- An invented 50-second piece, on paper
- Five layers that join and leave
- Four sections you can name
- Four automation lanes, none flat

PROBABILITY IS YOUR FRIEND

- Even a small chance makes patterns feel human
- Do not just stack patterns: build and evolve
- Static? Push automation and probability
- Try it live on a hi-hat

STEP 5: MIX AND REFINE

- Apply EQ, panning and plug-ins
- Arrange into a cohesive piece
- Use mute/unmute to change the arrangement
- Harder option: 90 seconds, alternates, 2 step automations

STEPS 6 AND 7: BOUNCE, PRESENT

1. Bounce your track
2. Zip the .logicx project
3. Create your Padlet post with 3 questions
4. Prepare to present

WHAT YOU TURN IN

- [ ] Bounced .mp3 or .wav
- [ ] Zipped .logicx project
- [ ] Named: Your Name – Pattern Prodigy
- [ ] At least 3 Step Sequencer features
- [ ] Padlet post with 3 questions
- [ ] Answer 2 questions on classmates' posts

HOW IT'S SCORED

CREATIVITY & ORIGINALITY	5 = Exceptional creativity; innovative, bold, and expressive	/ 5
TECHNICAL SKILL / DAW USE	5 = Expert-level command of multiple Logic systems	/ 5
COMPOSITION & STRUCTURE	5 = Professional pacing, flow, and musical arc	/ 5
SOUND DESIGN & MIX QUALITY	5 = Exceptional sound design; professional-quality mix	/ 5
DOCUMENTATION & PRESENTATION	5 = Exceptional; thorough insight and polished delivery	/ 5

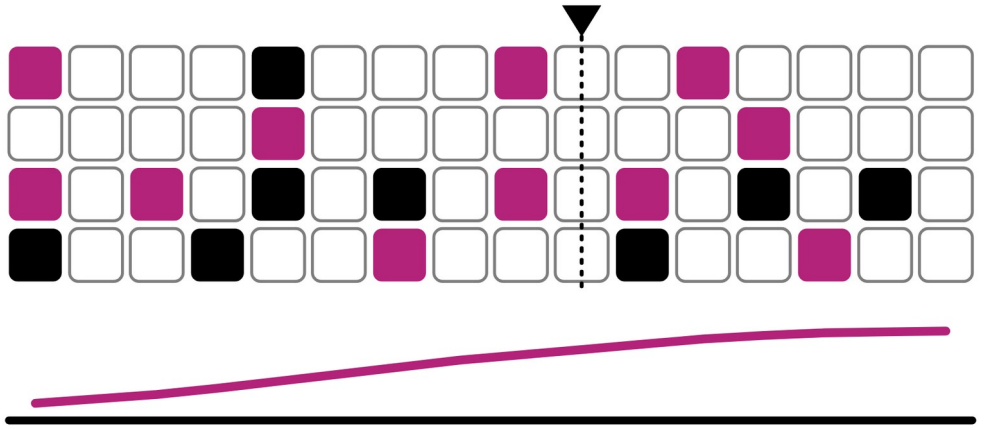

SCORED 1–5 · FINAL GRADE = AVERAGE OF YOUR SCORE AND MINE · / 25

PRESENTATION DAY

- Play your track
- Say which features you used and where
- Your Padlet post: 3 questions about your project
- Answer at least 2 of each classmate’s 3

ONE LAST THING...

- You built the pattern.
- You made it breathe.
- You let it evolve.
- Now press play.

REFLECTION · PAGE 23

Write it or talk it through: what went well, what was hard, what you would change.
