HUDSON BEAT

REMIX A CAROL IN ANY GENRE

CAROL FLIP

Logic Pro · piano-roll note charts · intro slides

GRADES 9–12 · 4 CLASS PERIODS · 26 PAGES + 15-SLIDE DECK

CAROL FLIP

How to use this resource

START HERE

Teacher

WHAT THIS IS ·

A 4-class-period remix project for high school music technology. Each student chooses one of three public-domain carols, enters its melody into Logic Pro from a piano-roll note chart, and flips it into a genre of their choice: new tempo, drums, bass, chords and sounds around the same tune. The remix is 60 to 90 seconds. Students plan it, build and mix it, present it and reflect on it. It is an original Hudson Beat project.

QUICK START ·

1. Read the pacing guide (page 5) and the teacher notes (pages 6–7).
2. Decide which carols to offer (page 9) and check the setup (page 4).
3. Print the student pages (pages 12–25), one set per student.
4. Open the intro deck and read the speaker notes for Class 1.

THE INTRO DECK ·

Every slide has a class: Class 1 (slides 1–6), Class 2 (slides 7–9), Class 3 (slides 10–11) and Class 4 (slides 12–15). Every slide has speaker notes.

Fonts: the deck uses Oswald and Source Sans 3 (free on Google Fonts, built into Google Slides). If PowerPoint or Keynote shows a different font, install the two fonts or present the PDF copy, which shows the intended look.

WHAT'S INSIDE ·

PART	PAGES	USE
Teacher pages	pages 2–11	How to use, overview, setup, pacing, teacher notes, Logic quick reference, tune sources, worked example (2 pages)
Student pages	pages 12–25	Three note charts, genre cards (2 pages), Flip plan, Arrangement plan, project sheet (3 pages), rubric, vocabulary, feedback planner, reflection page
Intro deck (separate file)	deck	15 slides, .pptx + PDF, speaker notes on every slide

NO AUDIO INCLUDED

No audio, recordings, lyrics, artists or albums are named or included. The three melodies are public domain and appear only as note charts. Students make every sound in their remixes themselves, from the instruments and drum kits in Logic.

MAKE IT FIT YOUR CLASS ·

- **Easier or harder:** see the variations on page 6: one looped section on Jingle Bells, or a mode flip with a new melody rhythm.
- **Carol choice:** Jingle Bells and Deck the Halls are winter songs; Silent Night is a Christmas carol. Offer the ones that suit your school, or a public-domain melody you approve.
- **Feedback:** students write three questions and answer classmates' on a class board or on paper.
- **Grading:** the rubric, /25, the average of the student's and your score (page 22).

IN ONE SENTENCE

Students learn that a genre is more than speed: drums, bass, chords and sounds change a tune while the melody stays.

Logic Pro is a product of Apple Inc. This resource is not affiliated with Apple.

CAROL FLIP

Project overview

OVERVIEW

Remix project

THE PROJECT IN ONE LINE

Carol Flip · Remix · Logic Pro

Take a carol everyone knows and flip it into any genre.

WHAT STUDENTS MAKE ·

One original remix, 60 to 90 seconds long, of a public-domain carol. The melody is entered from a piano-roll chart and stays recognizable; the tempo, drums, bass, chords and sounds belong to the student's chosen genre. It has at least four layers and an intro, melody sections and an outro, is mixed with volume, pan and EQ, and uses an effect that suits the genre. Students hand in a bounced .mp3 or .wav and the zipped .logicx project, plus their plans and a reflection, then play the remix and take questions.

WHAT THIS PROJECT REINFORCES ·

Teaches how a genre is built. Students learn that tempo, drums, bass, chords and sounds, not only the notes of a melody, make a style, and they practice entering and editing notes in Logic Pro's Piano Roll.

STANDARDS ·

Supports the National Core Arts Standards for Music (Music Technology, high school): generating and developing ideas (MU:Cr1.1, MU:Cr2.1), presenting work (MU:Pr6.1) and responding to it (MU:Re7.2).

GOALS ·

- Enter a melody into Logic Pro's Piano Roll from a note chart, with the right pitches and lengths
- Change a tune's genre by changing tempo, drums, bass, chords and sounds, not only the speed
- Keep a melody recognizable while everything around it is new
- Plan, build and explain a 60 to 90 second arrangement

AT A GLANCE ·

Grades	9–12, music technology or music production
Length	4 class periods: choose and plan, enter and flip, arrange and mix, present and reflect
Software	Logic Pro: Piano Roll, instruments, Step Sequencer or Drummer, effects, bounce
You supply	Macs with Logic Pro, headphones, a place to hand in files and a class board or paper for feedback
Assessment	Rubric, 5 categories scored 1–5, /25; final grade = average of the student's and the teacher's score (page 22)

BEFORE THEY START

Students should know how to open a project, add a software instrument and use the mixer in Logic. Nobody needs to read music: the charts name every pitch and length.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

CAROL FLIP

Setup and what to watch

SETUP

Teacher

YOU NEED ·

- **A Mac with Logic Pro** for each student, and **headphones**. Speakers help for the final listen.
- **A place to hand in** the .mp3 or .wav, the zipped .logicx and the reflection.
- **The three charts**, printed (pages 12, 13 and 14), or shown on the projector.
- **The genre cards**, printed (pages 15–16).
- **Printed student pages**, one set each (pages 12–25).
- **A MIDI keyboard** is optional: every melody can be drawn with the mouse.

BEFORE CLASS 1 ·

- [ ] Decide which carols you will offer (page 9).
- [ ] Open Logic Pro on a student computer: can you make a track, open the Piano Roll and hear playback through headphones?
- [ ] Decide how students will give each other feedback (a class board, or paper).
- [ ] Read the worked example (pages 10–11).

WHAT TO WATCH ·

Students enter the notes but get a wrong one, the flip is only a speed change, the melody is buried, or a genre is a name and nothing more. Pairs well with a listening day: play the finished flips without saying the title and let the class name the carol. A tune that people name quickly is a flip that worked.

IDEAS FOR THE ROOM

- Ask while students work: which of your three flips is this? Can you hear the carol?
- On Class 1, say each genre's tempo range aloud and tap it: 70 for lo-fi, 128 for house.
- A student who is stuck on a genre can start from a Drummer track and flip the rest.

CHOOSING CAROLS ·

A RESPECTFUL CHOICE

Jingle Bells and Deck the Halls are winter songs; Silent Night is a Christmas carol. Offer the ones that fit your school and let students choose. If a student prefers another melody, a public-domain one you approve (first published in the United States in 1930 or earlier) works with the same plan, and the blank piano roll on page 17 is there for their own chart.

KEEP THE VOLUME MODERATE

Bass-heavy genres and loud peaks are tiring in headphones. Tell students to start low and check the final mix at a normal level.

CAROL FLIP

Pacing guide · 4 class periods

PACING

Teacher

4 class periods. The “Plan” column is the day-by-day pacing; the other columns show what to put on the screen and in students’ hands.

CLASS	PLAN	TEACHER MOVES	DECK	STUDENT PAGES
CLASS 1	Choose a carol and a genre, fill in the Flip plan and start entering the melody.	Slides 1–6: the hook, what the project is, the four classes, the five moves and how to read a piano roll. Hand out the project sheet, the three charts, the genre cards and the Flip plan. Check that each student has a carol and a genre before they leave.	Slides 1–6	p. 12, p. 13, p. 14, p. 15, p. 16, p. 17, p. 19, p. 20, p. 21, p. 23
CLASS 2	Enter the melody, check it against the chart, then build the drums and bass of the genre.	Slides 7–9: entering the melody, one flip (major to minor) and why genre lives in the drums. Demonstrate the Piano Roll on the projector, then work time. Walk the room with one question: which of your three flips is this?	Slides 7–9	—
CLASS 3	Add chords and sounds, plan the form, build the arrangement and mix.	Slides 10–11: the worked example on paper and mixing while keeping the tune. Hand out the Arrangement plan. Then work time; ask each student to play their first 20 seconds and say which carol they hear.	Slides 10–11	p. 18
CLASS 4	Bounce, hand in, present and reflect.	Slides 12–15: what to turn in, the rubric, presentation day and the close. Students bounce, name their files and write their three feedback questions, then present. Reflection (page 25) follows the presentations.	Slides 12–15	p. 22, p. 24, p. 25

THE ONE THING TO DO ON CLASS 1

Make sure every student leaves with a carol, a genre and a tempo written on the Flip plan. If a genre is only a name, ask: what does the drummer play, and how fast?

IF YOU ONLY HAVE THREE CLASSES

Merge Classes 3 and 4: build and mix on Class 3, then bounce at the start of Class 4 and use the rest of it for presentations and reflection.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

WHAT THIS PROJECT REINFORCES ·

Teaches how a genre is built. Students learn that tempo, drums, bass, chords and sounds, not only the notes of a melody, make a style, and they practice entering and editing notes in Logic Pro's Piano Roll.

COMMON STUDENT STRUGGLES ·

- The notes go in but the tune sounds wrong: check the grid setting and the note lengths against the chart, bar by bar (Logic quick reference, page 8).
- The flip is only a speed change: ask which three things changed besides the tempo (the Flip plan, page 17).
- The melody gets buried under drums and bass: turn the backing down or EQ the melody up, so the carol stays the star.
- A genre name with no genre craft: use the genre cards (pages 15–16) to check the tempo, drums and sounds.

SUGGESTED VARIATIONS ·

Easier: Use Jingle Bells, loop one 4-bar section, and start from a drum pattern on a genre card or a Drummer track.

More Advanced: Flip the mode (major to minor) and the rhythm of the melody, then add a countermelody or a key change in the last section. Silent Night is the hardest chart: it is in 6/8.

WHERE THIS KIT HELPS WITH EACH STRUGGLE

- Wrong notes: the chart pages (pages 12, 13 and 14) list every note by bar, and the Logic quick reference (page 8) shows the grid.
- Only a speed change: the Flip plan (page 17) asks for three flips, and slide 8 shows one.
- A buried melody: the mix checks on the Arrangement plan (page 18) and slide 11.
- A genre in name only: the genre cards (pages 15–16) and slide 9.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

SUGGESTED RESOURCES ·

RESOURCE	HOW TO USE IT
The three note charts (pages 12, 13 and 14)	Hand out one chart each, or let students choose. Pitch names are printed, so nobody needs to read staff notation.
Genre cards (pages 15–16)	Students pick a genre and copy its drum pattern into the Step Sequencer. A blank card is there for a genre of their own.
Worked example (pages 10–11)	Jingle Bells in C minor as house music, planned on paper. Use it as a model, not a template; student projects will differ.

HOW TO GRADE ·

- The rubric: five categories, each scored 1–5, /25 (page 22). Students score themselves first; the final grade is the average of their score and yours.
- Melody Accuracy (rubric row 1): open the project and compare the Piano Roll with the chart, bar by bar. A planned change such as an octave or a minor mode is correct, not an error.
- The Flip and Genre Craft (rubric rows 2 and 3): ask which three things changed, then check tempo, drums and sounds against the genre card.
- Arrangement and Mix (rubric row 4): compare the project with the Arrangement plan (page 18). Is there an intro, melody sections and an outro, and can you hear the melody?
- Plan and Reflection (rubric row 5): the Flip plan (page 17), the questions on the feedback planner and the Reflection page (page 25) are the evidence.

REFLECTION ·

Every student reflects (page 25): a written or oral conversation about how you did on the project and what you would do differently next time. Students write it or talk it through with you; either way they answer the four prompts. Allow about 10 minutes after the presentations. Use it as evidence for the Plan & Reflection row of the rubric.

NOTES / OBSERVATIONS ·

Pairs well with a listening day: play the finished flips without saying the title and let the class name the carol. A tune that people name quickly is a flip that worked.

CAROL FLIP

Logic quick reference

SETUP

Teacher + student

Where to find the tools a Carol Flip is likely to use. Demonstrate what your class needs on Classes 1 and 2 and then let students work. Names are from current Logic Pro versions; labels move between versions, so check yours.

New project and tracks	File › New…, then add a Software Instrument track with Track › New Tracks…. Use one track for the melody and more for bass, chords and sounds.
Tempo and time signature	Type the tempo in the control bar. Silent Night is in 6/8: set the time signature before you enter notes (the control bar, or the Signature track in Global Tracks).
Make a region, open the Piano Roll	With the Pencil tool, click on the track where bar 1 starts to make an empty MIDI region, then double-click it to open the Piano Roll editor.
Draw notes from the chart	Pick a grid value in the Piano Roll's Snap menu (for example, 1/16 note) so notes land on the chart's sixteenth-note grid, click with the Pencil to add a note and drag its right edge to change its length. A MIDI keyboard is optional.
Fix wrong notes	Select a note and drag it up or down a row, or press delete. To lower every E to Eb, select the E notes together and move them down one row.
Timing and swing	In the Region inspector, use Quantize to tighten notes and its swing setting to make a straight groove bounce, as in lo-fi or reggae.
Transpose and octaves	Select a region and change Transpose in the Region inspector to move a whole melody up or down; 12 steps is one octave.
Drums	Make a Drummer track and pick a style, or make a Drum Machine Designer track and open the Step Sequencer: click the 16 steps for each drum, as on the genre cards.
Bass, chords and sounds	Browse the Library (press Y) for instruments, or open Alchemy, Retro Synth or Vintage Electric Piano. Session Players (Bass Player, Keyboard Player) can follow a Chord Track in Global Tracks.
Effects and mixing	Add plug-ins in a channel strip's Audio FX slots: Channel EQ, Compressor, Bitcrusher, Tape Delay, ChromaVerb. Press X for the Mixer, and use each track's volume and Pan.
Automation	Press A to show automation. Pick a parameter, such as a filter cutoff, volume or reverb send, and draw points so the sound moves.
Bounce and zip	File › Bounce › Project or Section (Command-B), MP3 or WAV. In Finder, Control-click the .logicx and choose Compress.

VERSION NOTE

Menu names are from current Logic Pro versions; older versions may differ slightly. Logic Pro is a trademark of Apple Inc., named only to describe what the project needs. This resource is not affiliated with Apple.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

CAROL FLIP

Tune sources and the public-domain rule

TEACHER

All three melodies are in the public domain, and each is printed here as a note chart only: no lyrics, no recordings and no published edition. The charts are written in C major (all white keys) so the pitches are easy to read, and checked against the notes in code.

TUNE	BY · YEAR	IN THIS KIT	GOOD FOR
Jingle Bells the chorus	James Lord Pierpont 1857	C major, 4/4 8 bars, 25 notes	The easiest chart: one repeated note, a few skips and a clear shape. A good first choice.
Deck the Halls the first phrase	traditional Welsh melody (“Nos Galan”) centuries old	C major, 4/4 4 bars, 19 notes	A short phrase that loops well: four bars, stepwise, with a quick run of eighth notes in bar 3.
Silent Night the whole melody	Franz Xaver Gruber 1818	C major, 6/8 12 bars, 46 notes	The hardest chart: 6/8 time and a dotted-eighth, sixteenth rhythm. It suits slow, gentle genres.

WHERE THE TUNES COME FROM ·

- **Jingle Bells:** First published in Boston in 1857 as “One Horse Open Sleigh”.
- **Deck the Halls:** A centuries-old Welsh winter melody, in print long before 1930. The English words (1862) are not used.
- **Silent Night:** Composed in 1818; the melody only. The words are not used.

THE PUBLIC-DOMAIN RULE ·

In 2026 a melody is in the public domain in the United States when it was first published in 1930 or earlier (1931 from 1 January 2027). If a student suggests another carol or winter song, check its first publication date before you approve it, and never use a recording, a film or pop version, or its lyrics unless they are public domain too.

PICKING A TUNE FOR A STUDENT ·

- **First time in the Piano Roll:** Jingle Bells. One repeated note, then a few skips.
- **Likes to loop and layer:** Deck the Halls. Four bars repeat well under any groove, and there is a blank piano roll to write an answer phrase.
- **Wants a challenge, or a slow, gentle genre:** Silent Night, in 6/8.

READING THE CHARTS

Pitch names run down the left; middle C is C4. Bold lines are bars, grey lines are beats. A note’s length is the name beside it: 16th, eighth, dotted eighth, quarter, dotted quarter, half, dotted half or whole. Chords are one idea that fits, not the only one.

WHY 6/8 IS HARDER

Silent Night has six eighth notes in a bar, felt as two groups of three. Students set 6/8 in Logic first. Offer it to students who want a challenge or a slow, gentle genre.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

CAROL FLIP

Worked example · an invented flip

EXAMPLE

Teacher

An **invented plan on paper**: Jingle Bells, the 8-bar chorus, flipped to C minor as house music at 128 BPM. No audio is included. Student projects will differ. Page 1 of 2: the plan and the flip.

1 · A WEAK PLAN

I will make Jingle Bells into a cool dance song.

It names no tempo, no carol part and nothing that changes.

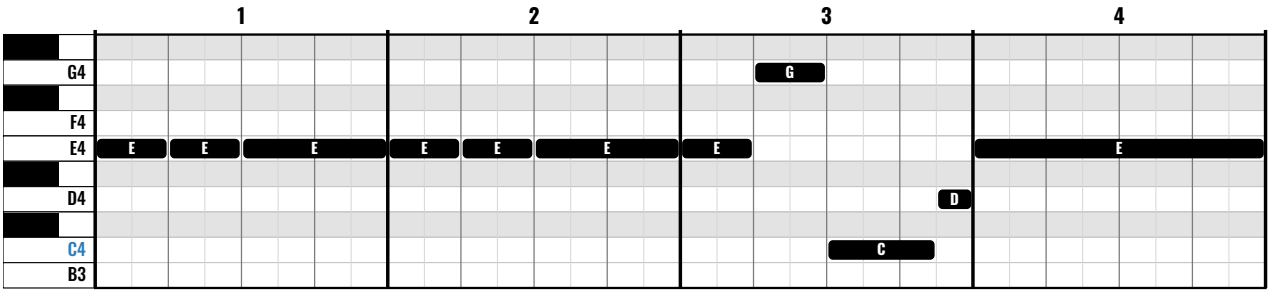

2 · A CLEAR PLAN

My carol is Jingle Bells, the 8-bar chorus. My genre is house at 128 BPM. I flip five things: the mode (every E becomes Eb, so it is in C minor), the tempo (128 BPM), the drums (a four-on-the-floor kick), the bass (short synth notes between the kicks) and the sounds (a bright synth lead and a pad). The melody keeps its rhythm, so people will still know it. It is 40 bars, 75 seconds: intro, melody, break, melody an octave higher, outro.

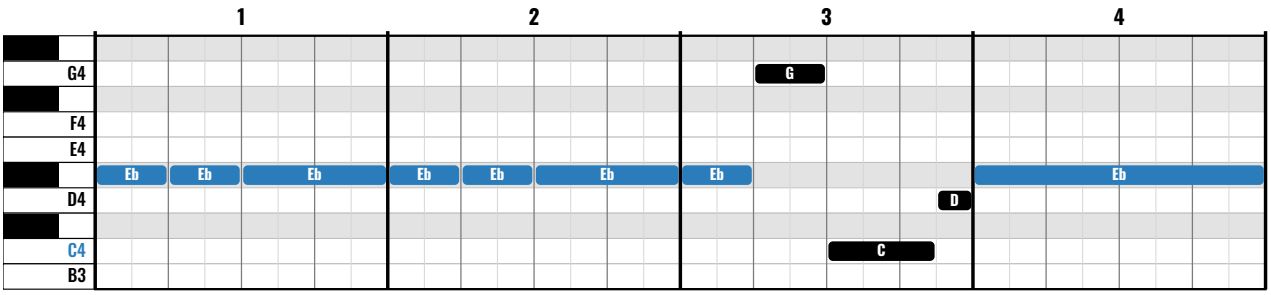

3 · FIVE FLIPS, AND WHAT STAYS ·

Mode	C major to C minor: every E becomes Eb (the only pitch that changes)
Tempo	from a bouncy walking pace to 128 BPM
Drums	a four-on-the-floor kick, claps on 2 and 4, offbeat hats
Bass	short synth notes on the chord roots, between the kicks
Sounds	a bright synth lead and a pad instead of bells
Stays	The order of the notes and every length: the melody keeps its rhythm, so the carol is still the carol.

4 · THE MODE FLIP ON THE PIANO ROLL (BARS 1–4) ·

ORIGINAL · C major

THE FLIP · C minor: every E becomes Eb

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

CAROL FLIP

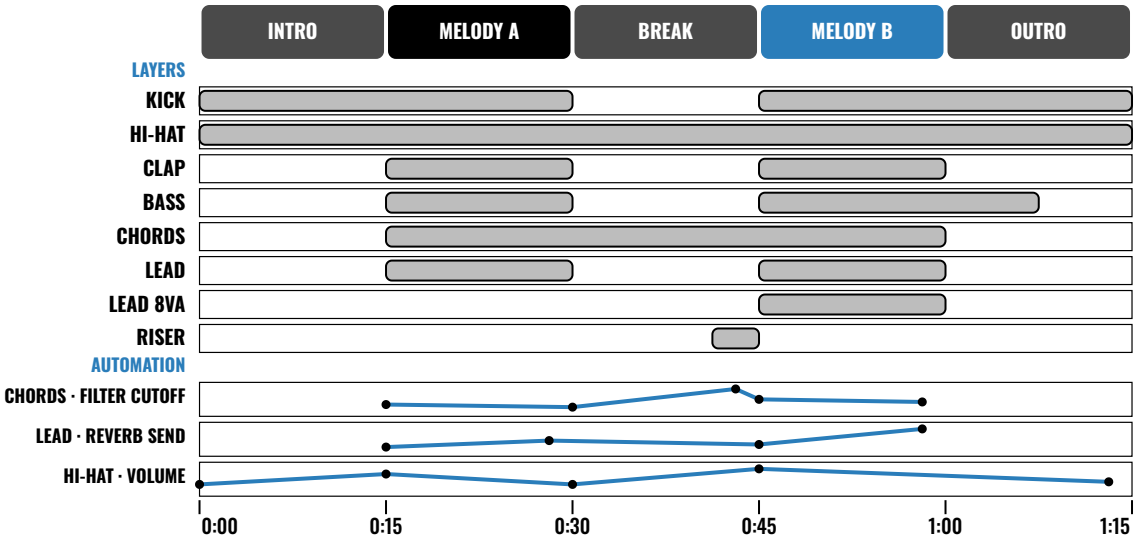

Worked example · the map

EXAMPLE

Teacher

The same remix, page 2 of 2: the map of the whole piece, then the numbers.

5 · THE MAP: 1:15, FIVE SECTIONS, EIGHT LAYERS, THREE LANES ·

Bar 1 to bar 40 at 128 BPM: 40 bars × 1.875 seconds = 75 seconds

6 · SECTIONS

Intro	bars 1–8	0:00–0:15
Melody A	bars 9–16	0:15–0:30
Break	bars 17–24	0:30–0:45
Melody B	bars 25–32	0:45–1:00
Outro	bars 33–40	1:00–1:15

7 · LAYERS (IN TO OUT)

Kick	a four-on-the-floor kick from the Step Sequencer; it drops out for the Break
Hi-hat	hats on the offbeats the whole way, quieter in the Break
Clap	claps on beats 2 and 4 in the two melody sections
Bass	a synth bass on the chord roots (C2, F2, G2), short notes between the kicks
Chords	a pad that plays Cm, Cm, Cm, Cm, Fm, Fm7, Cm9, Gm, one chord a bar, three times round
Lead	the flipped melody on a bright synth, as drawn on the piano roll
Lead 8va	the same melody an octave higher, added only in Melody B
Riser	a filter sweep on a synth that rises for two bars into Melody B

8 · THE CHORDS OF THE 8-BAR LOOP, WITH THE BASS ROOT (THE MELODY'S LONG NOTES ARE CHORD TONES)

Cm bass C2 bar 1	Cm bass C2 bar 2	Cm bass C2 bar 3	Cm bass C2 bar 4	Fm bass F2 bar 5	Fm7 bass F2 bar 6	Cm9 bass C2 bar 7	Gm bass G2 bar 8

9 · CHECKING THE NUMBERS

One bar of 4/4 at 128 BPM lasts 240 ÷ 128 = 1.875 seconds, so 40 bars = 75 seconds, inside 60 to 90. The sections are 8 + 8 + 8 + 8 + 8 bars = 40. Melody B has the most layers (7). **Three feedback questions (invented):** 1. Which carol did you hear, and how fast did you know? 2. Where did the music build, and where did it drop? 3. What would you change so the genre is clearer?

ABOUT THIS CHART

Composed in 1818; the melody only. The words are not used. Set the time signature to 6/8 first. Each bar has two groups of three eighth notes, so count 1-2-3, 4-5-6.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

CAROL FLIP

Genre cards · 1 of 2

STUDENT

Classes 1–2

A genre is a bundle of choices. Each card gives the tempo range, a one-bar drum pattern (16 steps, 4 to a beat; shaded steps are the beats), a bass idea, chords in a key that works with the carol charts, and sounds to try. Copy a pattern into the Step Sequencer, or use a Drummer track. Page 16 has two more cards and a blank one.

LO-FI HIP-HOP · 70–90 BPM · LAID-BACK, WITH SWING

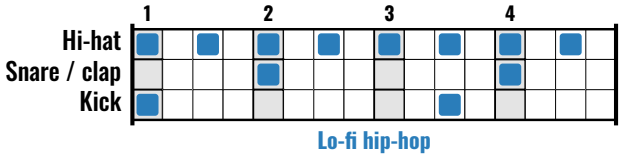

Drums. Kick on beat 1 and just after beat 3; snare on beats 2 and 4; hats on every eighth note. Add swing in Logic's quantize settings.

Bass. Soft sub or electric bass: long root notes.

Chords. Cmaj7 – Am7 – Dm7 – G7 (C major)

Sounds. An electric piano with a low-pass filter, a little Bitcrusher, a quiet Tape Delay.

Try. Play the melody an octave lower, a hair behind the beat.

Lo-fi hip-hop

HOUSE · 120–128 BPM · DRIVING, FOUR ON THE FLOOR

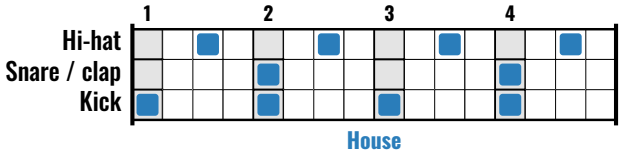

Drums. Kick on every beat; claps on beats 2 and 4; hats on the offbeats (the "and" of each beat).

Bass. Short synth notes on the offbeats, between the kicks.

Chords. Am – F – C – G (A minor or C major)

Sounds. Bright synth chords or stabs (Alchemy or Retro Synth), a lead for the melody, a filter-sweep riser.

Try. Use the Compressor's side chain so the pad ducks on every kick, and cut the kick for a break.

House

TRAP · 130–150 BPM · HALF-TIME: SLOW AND HEAVY

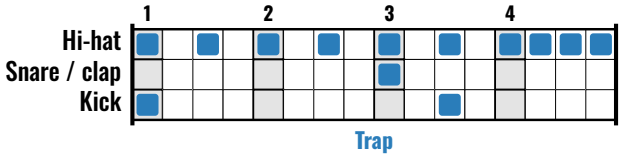

Drums. Snare or clap only on beat 3, halfway through the bar; kick off the beat; busy hats, with a quick roll at the end.

Bass. 808-style: long, low sine-wave notes (a sub bass in Alchemy or Retro Synth).

Chords. Cm – Ab – Eb – Bb (C minor)

Sounds. A dark pad, a bell or pluck for the melody, crisp hats.

Try. Play the melody half as fast, each note twice as long, so it floats over the beat.

Trap

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

CAROL FLIP

Genre cards · 2 of 2

STUDENT

Classes 1–2

REGGAE · 70–80 BPM · RELAXED, WITH SPACE

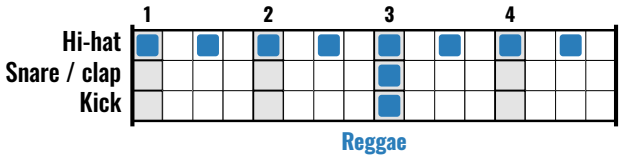

Drums. One drop: kick and snare (or rim) together on beat 3 only, nothing on beat 1; hats on every eighth.

Bass. Deep and melodic, with plenty of space between notes.

Chords. C – F – G – C (C major)

Sounds. Short chops of keys or guitar-style chords on the offbeats, an organ, a little tape echo.

Try. Leave a gap after every bass note, and sit the melody slightly behind the beat.

Reggae

POP-ROCK · 100–130 BPM · STEADY AND PUNCHY

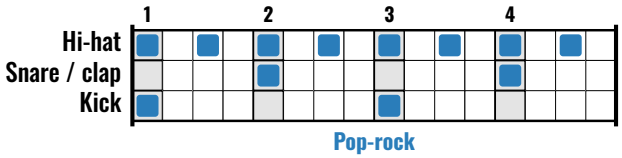

Drums. Kick on beats 1 and 3, snare on beats 2 and 4, hats on every eighth. A Drummer track set to a rock style plays this for you.

Bass. Root notes in steady eighth notes.

Chords. C – G – Am – F (C major)

Sounds. An organ or piano for the chords, a clear lead for the melody, a touch of reverb.

Try. Hold the drums back for the intro and bring them in with a fill.

Pop-rock

YOUR GENRE · FILL IN YOUR OWN CARD

Pick a genre that is not on these cards. Listen to two or three tracks in it (not included in this kit), then fill in the card.

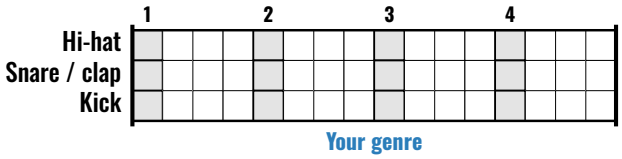

Tempo range: _____

Drums: _____

Bass: _____

Chords: _____

Sounds: _____

Your genre

Click the steps you want in the grid: 16 steps = 1 bar, 4 steps = 1 beat.

Flip plan

Class 1

Name _____ Date _____

Step 2: plan. Pick one carol and one genre, then decide what you will flip. You need at least three flips (requirement 3), and the carol must still be recognizable.

MY CHOICES

My carol: _____ **My genre:** _____

Tempo (BPM): _____ **Key or mode:** _____ **Why this tempo:** _____

WHAT I FLIP (CHECK AT LEAST THREE)

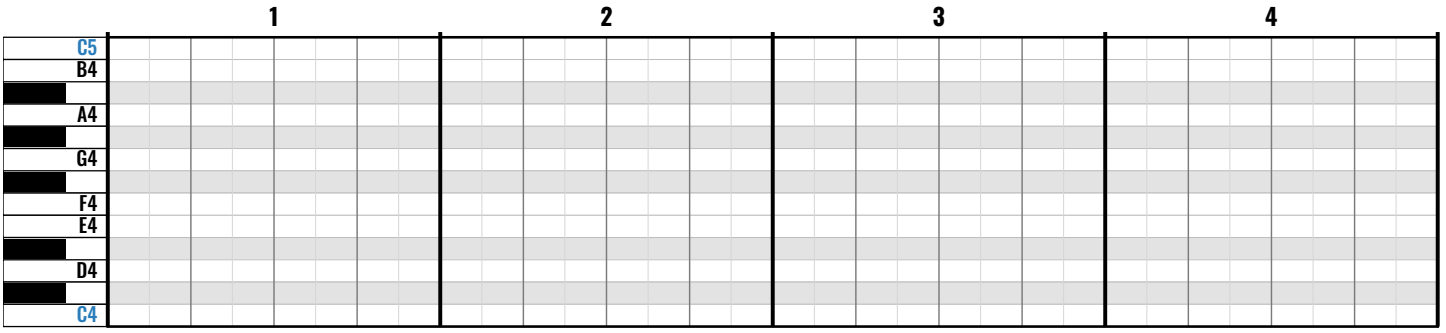

- ☐ **Tempo** — how: _____
- ☐ **Drums** — how: _____
- ☐ **Bass** — how: _____
- ☐ **Chords** — how: _____
- ☐ **Sounds** — how: _____
- ☐ **Rhythm of the melody** — how: _____
- ☐ **Octave** — how: _____
- ☐ **Mode or key** — how: _____
- ☐ **Effects** — how: _____

What stays the same, so people still know the tune: _____

MY LAYERS

LAYER	SOUND OR INSTRUMENT IN LOGIC	WHAT IT PLAYS

SKETCH: A CHANGED RHYTHM FOR THE FIRST FOUR BARS (PENCIL, OPTIONAL)

CAROL FLIP

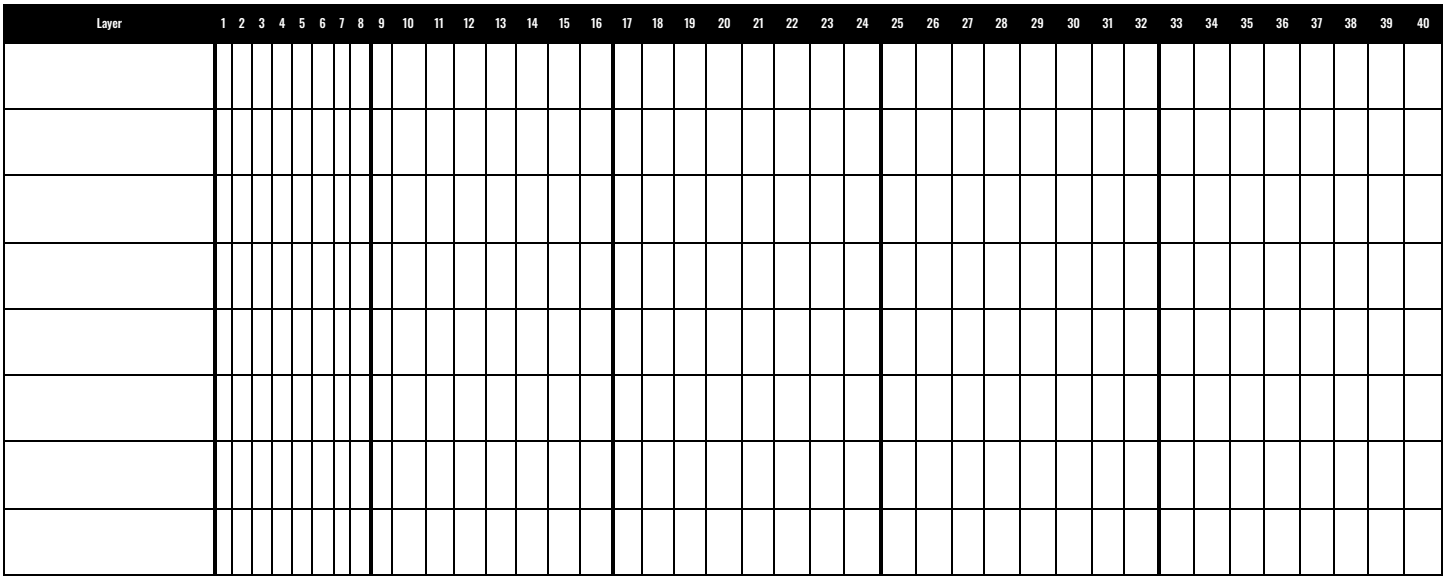

Arrangement plan

STUDENT

Classes 2–3

Name _____ Date _____

Step 5: arrange. Give your remix a form: an intro, melody sections and an outro. Shade the bars where each layer plays, write the layer's name at the left, and mark where each section starts (every thick line is 8 bars). 60 to 90 seconds only.

MY SECTIONS

Intro: _____ **bars** _____

Melody: _____ **bars** _____

Break or change: _____ **bars** _____

Outro: _____ **bars** _____

LENGTH HELPER (4/4)

BPM	ONE BAR	60 S	75 S	90 S
80	3 s	20	25	30
96	2.5 s	24	30	36
112	2.143 s	28	35	42
128	1.875 s	32	40	48
144	1.667 s	36	45	54

Bars needed for each length. Bars × 240 ÷ BPM = seconds. In 6/8, read the length from Logic's clock.

My tempo: _____ **Bars:** _____ **Length: bars × 240 ÷ tempo =** _____ **seconds**

CHECKS BEFORE I BOUNCE

- ☐ I can name the carol in the first ten seconds, and the melody is louder than the drums and bass.
- ☐ Every pitch and length matches the chart, or a change I planned.
- ☐ I can hear every layer, and none is buried or too loud.
- ☐ At least one effect fits my genre, and EQ is in use.
- ☐ The remix is between 60 and 90 seconds.

Name _____ Date _____

CAROL FLIP

Music Technology | *Remix Project* | 4 class periods

OVERVIEW ·

Take a carol everyone knows and flip it. Choose one of three public-domain melodies, enter it into Logic Pro from a piano-roll note chart, and remix it in any genre you like: change the tempo, the drums, the bass, the chords, the sounds and, if you want, the mode or the rhythm of the tune. Your finished remix is 60 to 90 seconds long, and people should still be able to name the carol.

GOALS ·

- Enter a melody into Logic Pro's Piano Roll from a note chart, with the right pitches and lengths
- Change a tune's genre by changing tempo, drums, bass, chords and sounds, not only the speed
- Keep a melody recognizable while everything around it is new
- Plan, build and explain a 60 to 90 second arrangement

KEY VOCABULARY ·

Remix	A new version of an existing tune that changes its style, sounds or structure but keeps something people recognize
Piano roll	An editor that shows each note as a bar: height is pitch, length is how long it lasts, and left to right is time
Genre	A style of music, such as lo-fi, house, trap or reggae, set by its tempo, rhythm, sounds and harmony
Public domain	Music whose copyright has ended, so anyone may use the melody; the three carols in this project are

STUDENT

Project sheet · requirements and steps

Name _____ Date _____

REQUIREMENTS ·

- ☐ Choose one of the three carols (or a melody your teacher approves) and enter it into a Software Instrument track in Logic Pro; every pitch and length matches the chart
- ☐ Choose one genre and set a tempo that fits it (genre cards: pages 15–16)
- ☐ Flip at least three things from this list: tempo, drums, bass, chords, sounds, rhythm of the melody, octave, mode or key
- ☐ Build a 60 to 90 second arrangement with at least four layers (melody, drums, bass and one more) and an intro, melody sections and an outro
- ☐ Use at least one effect that suits your genre, and balance the mix with volume, pan and EQ
- ☐ Reflect on how the flip went, in writing or out loud (page 25)

STEPS / PROCESS ·

1. **Choose** — Pick one carol and one genre (carol charts: pages 12, 13 and 14; genre cards: pages 15–16)
2. **Plan** — Fill in your Flip plan: tempo, key or mode, what stays the same and what you flip (page 17)
3. **Enter the melody** — Draw or play the chart into the Piano Roll and listen for wrong notes (Logic quick reference: page 8)
4. **Flip it** — Build drums, bass and chords in your genre, and change the sounds, the rhythm or the octave of the melody
5. **Arrange** — Plan the form on the Arrangement plan (page 18), then build 60 to 90 seconds with an intro, melody sections and an outro
6. **Mix and finish** — Balance with volume, pan and EQ, add an effect that suits your genre, and bounce with the file name format
7. **Present & get feedback** — Write three questions you want classmates to answer about your remix. Play it, say the three things you flipped, and answer at least 2 of each classmate's questions. Then reflect (page 25).

CAROL FLIP

Project sheet · tips and checklist

STUDENT

Name _____ Date _____

TIPS FOR SUCCESS ·

- Keep the melody the star. If a listener cannot name the carol in the first ten seconds, simplify what is around it.
- Change the feel before you change the notes: tempo, drums and bass flip a tune faster than new notes do.
- One minute goes fast. Add one layer at a time and let each one be heard before you add the next.
- Save a new version of your project before each big experiment, so you can always go back.

SUBMISSION CHECKLIST ·

- ☐ Bounced .mp3 or .wav handed in where your teacher says
- ☐ Zipped .logicx project file handed in
- ☐ Files named correctly: “Your Name – Carol Flip – Carol, Genre”
- ☐ Flip plan, Arrangement plan and Reflection page handed in
- ☐ Rubric self-score done (page 22)
- ☐ I can name the three or more things I flipped

Rubric

RUBRIC

/ 25

Name _____ Date _____

GRADING RUBRIC /25

Carol Flip | Original Project

Each category is scored 1–5. Score yourself first; your final grade is the average of your self-score and your teacher's score.

Category	1	2	3	4	5
MELODY ACCURACY	The melody is missing or mostly wrong	Several wrong pitches or lengths	Mostly right, with a few slips	Every pitch and length matches the chart, or a change that was planned	Exact, and any planned change (octave, mode) is done correctly and on purpose
THE FLIP	Sounds like the original with a new speed	One or two things changed, little sign of a genre	Three clear changes; the carol is still recognizable	Several changes that work together in one genre	A confident, original take: every choice says the genre and the carol is unmistakable
GENRE CRAFT	Tempo, drums and sounds do not fit any genre	Some choices fit; others pull another way	Tempo and drums fit the genre	Tempo, drums, bass and sounds all fit the genre	Sounds like the genre: groove, bass, chords and effects all line up
ARRANGEMENT & MIX	No clear form; layers cover each other	A loop with little change; muddy mix	Intro, melody sections and outro; mostly balanced	Clear form with layers that enter and leave; clean mix	A form that builds and resolves; every layer audible, melody on top
PLAN & REFLECTION	Plans, presentation or reflection missing	Thin plan; little to say about choices	Plan and reflection complete, with basic detail	Clear plan; thoughtful reflection and good answers to questions	Insightful reflection and a polished, confident presentation

Student Score: _____ / 25	Teacher Score: _____ / 25

After presenting

Name _____ Date _____

WHAT A REFLECTION IS

A reflection is a written or oral conversation about how you did on the project and what you would do differently next time. Answer all four prompts in your own words. You choose how.

☐ **Written.** I will write my answers on this page.

☐ **Oral.** I will talk my answers through with my teacher. My teacher fills in the box at the bottom.

1 What went well? Name something in your project you are proud of, and say why it worked.

2 What did you struggle with? Say what was hard and what you tried to fix it.

3 What would you do differently next time? Be specific: a step, a choice, a sound or a tool.

4 Look at the rubric (page 22). Which category are you proudest of, and which would you work on first next time?

TERMS OF USE

Thank you for your purchase!

© 2026 Brian Lotze. Hudson Beat by Brian Lotze. All rights reserved. This purchase gives **one teacher** a license to use this resource (the PDF and the intro deck) with their own students.

YOU MAY

- Print and copy pages for your own classroom and students, year after year.
- Present the intro deck to your own classes and edit it for your own teaching.
- Share pages with your own students through a password-protected class site or learning platform.
- Leave the pages for a substitute teacher who teaches your own students.

YOU MAY NOT

- Share, email or copy this resource for other teachers, a whole school or a district. Additional licenses are available on Teachers Pay Teachers.
- Post any part of it on a public website, shared drive or social media.
- Sell, give away or claim any part of it as your own, or edit it into a new product.

QUESTIONS?

Please use the Q&A tab on the Hudson Beat by Brian Lotze store on Teachers Pay Teachers. If something looks wrong, let me know there and I will fix it.

CREDITS

- Project sheet, rubric, teacher notes and intro deck: original work by Brian Lotze, Hudson Beat.
- Piano-roll note charts of three public-domain melodies (Jingle Bells, 1857; Deck the Halls, a traditional Welsh melody; Silent Night, 1818), the worked example, the genre cards, the hero, card and arrangement drawings and all layouts: original work, Hudson Beat. No lyrics, recordings or published editions are included.
- No audio, video, album art, screenshots, presets, templates, links or chart data are included. No student work is included.
