THE SOUND CHAIN

Your concept decides every step: a sound only goes down the chain if it helps break your rule

- Record or create a sound
- Distort and deconstruct with effects
- Transform it until it is strange
- Automate so it keeps changing

GATHER UNUSUAL SOUNDS

- Record everyday objects and spaces
- Create sounds inside Logic
- Keep every file, name it, log it
- Keep recordings school-appropriate and kind

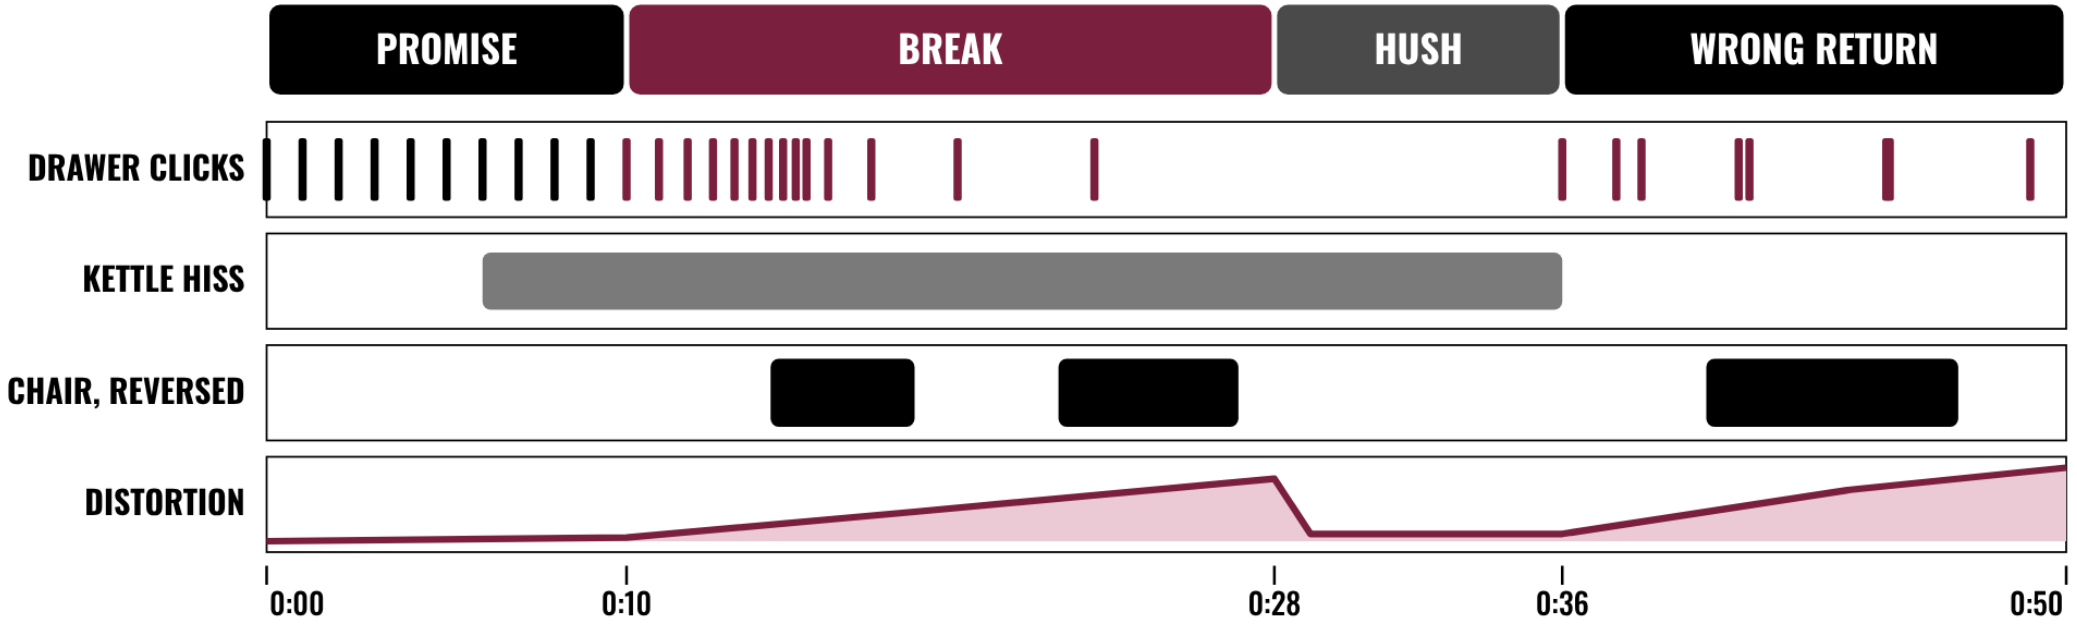

WATCH ME: TURN A SOUND INSIDE OUT

1. Record one short everyday sound
2. Reverse it or change its speed and pitch
3. Add distortion or delay
4. Automate one effect knob
5. Save it and note what you did

WORKING DAYS: BUILD AND SHAPE

- Build with effects, automation and distortion
- Lean into the rule you chose
- Shape it: intentional, not accidental
- Save versions as you go

WORKED EXAMPLE: 50 SECONDS ON PAPER

- The rule is a steady pulse
- Every sound has a job
- It breaks, hushes, returns wrong
- Plan 45–60 seconds

IS IT ON PURPOSE?

- Could a listener tell which rule you broke?
- Does every sound have a job?
- Does it change over its 45 to 60 seconds?
- Can you explain every choice?
