BREAK THE RULES ON PURPOSE
ANTI-MUSIC MANIFESTO

DMP2 · experimental music · artist statement · intro slides

GRADES 9–12 · 7 CLASS PERIODS · 23 PAGES + 19-SLIDE DECK

ANTI-MUSIC MANIFESTO

How to use this resource

START HERE

Teacher

WHAT THIS IS ·

A 7-class-period experimental music project for high school music technology. Each student picks a musical convention (structure, tonality, rhythm or another) and breaks it on purpose, records or creates unconventional sounds, uses Logic's effects and automation to distort or deconstruct them, builds a 45–60 second piece, and writes a one-paragraph artist statement. It is an open-ended project from my Digital Music Production 2 course (focus: experimental and conceptual), and the projects in that course can be taught in any order.

QUICK START ·

1. Read the pacing guide (page 5) and my teacher notes (pages 6–7).
2. Choose a short passage for the Class 1 listening hook (page 4).
3. Print the student pages (pages 12–22), one set per student.
4. Open the intro deck and read the speaker notes for Class 1.

THE INTRO DECK ·

Every slide has a class: Class 1 (slides 1–7), Class 2 (slides 8–10), Class 3 (slide 11), Class 4 (slides 12–13), Class 6 (slides 14–17) and Class 7 (slides 18–19). Class 5 is a working day with no new slide. Every slide has speaker notes.

Fonts: the deck uses Oswald and Source Sans 3 (free on Google Fonts, built into Google Slides). If PowerPoint or Keynote shows a different font, install the two fonts or present the PDF copy, which shows the intended look.

WHAT'S INSIDE ·

PART	PAGES	USE
Teacher pages	pages 2–11	How to use, overview, setup, pacing, teacher notes, what changed, Logic quick reference, Rules, worked example
Student pages	pages 12–22	Concept sheet, Sound log, Build plan, Statement planner, project sheet (3 pages), rubric, vocabulary, feedback planner, reflection
Intro deck (separate file)	deck	19 slides, .pptx + PDF, speaker notes on every slide

NO AUDIO INCLUDED

No audio, video, songs or examples are included. Students record or create every sound themselves, so everything in their pieces is original. For the listening hook, you choose a short passage yourself and find it on a service your school allows.

MAKE IT FIT YOUR CLASS ·

- **Easier or harder:** my variations on page 6: pick from 3–5 rule cards (page 10), or a 90-second piece with a written manifesto.
- **Feedback board:** my sheets use Padlet for the three questions; any class board works.
- **Listening:** my notes suggest a brief listening session of experimental music first; you choose the passages.
- **Grading:** my rubric, /25, the average of the student's and your score (page 19).

IN ONE SENTENCE

Students choose a rule of music, break it on purpose, and prove it was on purpose with a piece and a paragraph.

Logic Pro is a product of Apple Inc. This resource is not affiliated with Apple.

ANTI-MUSIC MANIFESTO

Project overview

OVERVIEW

DMP2 · Open-ended

FROM MY DMP2 PROJECT MENU

Anti-Music Manifesto · Open-Ended · Experimental & Conceptual

Break the rules on purpose. Create a deliberate piece of anti-music with a written artist statement.

WHAT STUDENTS MAKE ·

One 45–60 second piece of anti-music that intentionally breaks at least one major convention, built from sounds they record or create and deconstructed with effects and automation, plus a one-paragraph artist statement. They hand in a bounced .mp3 or .wav, the zipped .logicx project and the statement, plus a Padlet post with three feedback questions, then play the piece and present the concept.

WHAT THIS PROJECT REINFORCES ·

Pushes creative boundaries and critical thinking about what music is. Requires students to articulate artistic intent, which strengthens their ability to talk about creative work.

STANDARDS ·

Supports the National Core Arts Standards for Music (Music Technology, high school): generating and developing ideas (MU:Cr1.1, MU:Cr2.1), presenting work (MU:Pr6.1) and responding to it (MU:Re7.2).

GOALS ·

- Challenge conventional ideas of what music is and can be
- Use Logic Pro to create a deliberate, expressive piece that defies expectations
- Explore unconventional sound sources, effects, and techniques
- Articulate artistic intent through a written artist statement

AT A GLANCE ·

Grades	9–12: the second-year course, after a first year of Logic Pro basics
Length	7 class periods: concept, sounds, three working days, statement and mix, present
Software	Logic Pro: audio recording, effects, automation, bounce
You supply	Macs with Logic Pro, headphones, a way to record sound, a feedback board, and speakers if you can
Assessment	My rubric, 5 categories scored 1–5, /25; final grade = average of the student's and the teacher's score (page 19)

BEFORE THEY START

Students should already know how to open a project, record and edit audio, add effects and automation, and save, bounce and zip in Logic. The quick reference (page 9) shows where each tool lives.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

ANTI-MUSIC MANIFESTO

Setup and a safe start

SETUP

Teacher

YOU NEED ·

- **A Mac with Logic Pro** for each student, and **headphones**. Speakers help for the final listen.
- **A way to record sound:** a microphone, the computer's built-in microphone, or another recorder students already use.
- **A place to submit** an .mp3 or .wav, a zipped .logicx project and the artist statement (your class page).
- **A feedback board** for the three questions (my sheets use Padlet).
- **Printed student pages**, one set each (pages 12–22).

BEFORE CLASS 1 ·

- [ ] Choose one or two short passages of experimental music for slide 2, preview them at a low volume, and find them yourself.
- [ ] Check that a student computer can record a sound and play it back through headphones.
- [ ] Decide how students will record: at their desks, around the room, or on a short walk with permission.
- [ ] Print the student pages; set up the submission spot and the feedback board.

MAKING IT FEEL SAFE ·

My notes say some students are uncomfortable making "bad" music on purpose. A plan that works:

- **Say it first.** This is artistic exploration, not failure. A rule broken on purpose is a skill.
- **Concept before sound.** Nobody opens a session until the Concept sheet (page 12) names a rule and a reason.
- **Offer a way in.** For students who want one, hand out the rule cards on page 10.

KIT SUGGESTIONS, NOT PART OF MY SHEETS

- Keep headphone volume moderate: distortion and noise can be much louder than they sound.
- Ask permission before recording a person, and keep recordings school-appropriate.
- Name and log every sound the moment it is recorded (Sound log, page 13).
- Save a numbered version before every big change (page 9).

LISTENING ROUTINE FOR SLIDE 2

Play the passage once. Ask: what rule does it seem to break, and does it feel planned or accidental? Play it again and take answers. The same sounds can feel either way, and that gap is the lesson: intention.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

ANTI-MUSIC MANIFESTO

Pacing guide · 7 class periods

PACING

Teacher

7 class periods, as on my project menu. The “My plan” column is my day-by-day pacing guide as I wrote it; the other columns show what to put on the screen and in students’ hands.

CLASS	MY PLAN	TEACHER MOVES	DECK	STUDENT PAGES
CLASS 1	**Class 1:** Introduction. Discuss what anti-music means. Brainstorm concepts.	Slides 1–7: hook, what anti-music is, three rules to break, steps 1 and 2, intention over accident. Hand out the project sheet, the Rules page and the Concept sheet.	Slides 1–7	p. 10, p. 12, p. 16, p. 17, p. 18, p. 20
CLASS 2	**Class 2:** Gather sounds, begin building. Write initial concept notes.	Slides 8–10: the sound chain, where sounds come from, a live demo. Students fill in the Sound log and finish the Concept sheet.	Slides 8–10	p. 12, p. 13
CLASS 3	**Classes 3–5:** Working days — build, shape, refine.	Slide 11: build, shape, refine. Then work time.	Slide 11	p. 14
CLASS 4		Slides 12–13: the worked example on paper and the “is it on purpose?” test. Then work time.	Slides 12–13	p. 14
CLASS 5		Full working day: refine and layer. Ask each student to play you the moment where the rule breaks.	No new slides	—
CLASS 6	**Class 6:** Write artist statement. Final mix and bounce. Prepare presentations.	Slides 14–17: artist statement, mix and bounce, what to turn in, the rubric. Students self-score and post their three questions.	Slides 14–17	p. 15, p. 19, p. 21
CLASS 7	**Class 7:** Presentations with Padlet Q&A peer feedback.	Slides 18–19: presentation day and the close. Every student presents and answers 2 of each classmate’s questions. Reflection (page 22) follows the presentations.	Slides 18–19	p. 21, p. 22

THE ONE RULE FOR CLASS 1

Students define the concept BEFORE they build (my first struggle). No session opens until the Concept sheet (page 12) names a rule and a reason. Slide 2 is the listening routine my notes suggest.

CLASSES 3–5

Working days. Class 5 has no new slide. Circulate and ask: which rule is this breaking, and how would a listener know it was on purpose?

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

ANTI-MUSIC MANIFESTO

WHAT THIS PROJECT REINFORCES ·

Pushes creative boundaries and critical thinking about what music is. Requires students to articulate artistic intent, which strengthens their ability to talk about creative work.

COMMON STUDENT STRUGGLES ·

- Students make random noise and call it anti-music. Push them to define their concept BEFORE they start building.
- Artist statements are vague. Require them to name the specific rule they're breaking and explain their reasoning.
- Some students are uncomfortable making "bad" music on purpose. Frame it as artistic exploration, not failure.
- Students don't use Logic's tools — they just bang on a keyboard. Encourage effects, automation, and sound manipulation.

SUGGESTED VARIATIONS ·

Easier: Provide 3–5 specific rules to break (e.g., "make a track with no rhythm," "use only dissonant chords") and let students choose one.

More Advanced: Require a 90-second piece with a written manifesto (not just a statement) defending their artistic philosophy. Pair with research on an experimental artist.

WHERE THIS KIT HELPS WITH EACH STRUGGLE

- Random noise: the Concept sheet (page 12) asks for the rule and the reason before anything is built.
- Vague statements: the Statement planner (page 15) and the sample statement on page 11.
- Uncomfortable with "bad" music: the Rules page (page 10) has six rule cards and says breaking a rule is a choice.
- Not using Logic's tools: the Sound log (page 13) and the quick reference (page 9).

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

SUGGESTED RESOURCES ·

MY LIST	IN THIS KIT
John Cage — 4'33" (YouTube)	Named as I listed it. No link, audio or video is included, so find your own copy on a service your school allows. Slide 2 and page 10 give a listening routine that works with any passage you pick.
Introduction to experimental music (YouTube)	Named as I listed it; nothing is included. Choose a short introduction yourself and watch it before Class 1 if you can.
Examples of noise music and sound art	Named as I listed it; no examples are included. Pick one or two short passages for the Class 1 listening, and preview them at a low volume first.

HOW TO GRADE ·

- My rubric: five categories, each scored 1–5, /25 (page 19). Students score themselves first; the final grade is the average of their score and yours.

Suggestions from this kit, not part of my rubric:

- Creativity & Originality and Composition & Structure: ask the student to say, in one sentence, the rule they broke (the Concept sheet, page 12, holds it). A piece that breaks no rule, or breaks one by accident, is the "random noise" my notes warn about.
- Technical Skill: look at the Sound log (page 13). Which sounds were recorded or created, and which effects and automation changed them?
- Sound Design & Mix Quality: ask whether the harsh parts are meant. A distorted or noisy sound can still be balanced against the others; levels should be a choice.
- Documentation & Presentation: the artist statement (Statement planner, page 15) should name the rule and give a reason. The Concept sheet, Sound log, Build plan and the Reflection page (page 22) are the evidence.

REFLECTION · ADDED BY THIS KIT ·

The rubric mentions reflection, but the project sheet has no reflection task, so this kit adds one (page 22): a written or oral conversation about how you did on the project and what you would do differently next time. Students write it or talk it through with you; either way they answer the four prompts. Allow about 10 minutes after the presentations. It adds no points and no rubric row; use it as evidence when you score Documentation & Presentation.

NOTES / OBSERVATIONS ·

This project sparks great class discussions. Consider a brief listening session of experimental music before starting.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

ANTI-MUSIC MANIFESTO

What changed from the original

CHANGES

Teacher

This kit is built from three of my documents: the **Project Sheet & Rubric**, the **Teacher Notes** and the **Anti-Music Manifesto** entry on my DMP2 project menu. This page lists every change to my wording, so you know exactly what is mine and what was added.

WORDING CHANGES ·

- My LMS name is written as “your class page” (checklist items 1, 2 and 4).
- Page numbers are added to steps 1 to 5 (the Concept sheet, Sound log, Build plan and Statement planner).
- My three suggested resources are listed as I wrote them (page 7). None is included: no link, audio or video comes with the kit, and the artists’ names appear only where I wrote them (tip 2 and the resource list).
- My pacing guide’s “Classes 3–5” row spans the Class 3, 4 and 5 rows, so each class can name its slides.
- Layout only: the rubric’s Name and Date lines moved to the top; its Notes box became ruled lines.
- The intro deck shortens my wording (full wording on pages 16–18): slide 3 shortens the definition of anti-music, slide 6 shortens steps 1 and 2, slide 7 shortens the first struggle, slide 11 shortens steps 3 and 4, slide 14 shortens step 5, slide 15 shortens step 6, and slide 16 shortens the submission checklist.
- **Reflection added (page 22).** My rubric mentions reflection, but the project sheet has no reflection task. This kit adds one, following my definition: a written or oral conversation about how the student did on the project and what they would do differently next time. It adds no points and no rubric row.

KEPT AS I WROTE IT ·

Everything else from my three documents is kept as I wrote it: the goals, the five vocabulary terms, the five requirements, steps (apart from the page numbers), tips, checklist and file name (“Your Name – Anti-Music Manifesto”), the rubric (five categories scored 1–5, /25, the average of the student’s and the teacher’s score), what the project reinforces, the four common struggles, the variations, my day-by-day pacing and my closing note, and the project menu entry quoted on page 3. No rubric row is added and the requirements are unchanged.

NEW IN THIS KIT ·

Everything else is new and supports my sheets without changing them: how to use the kit, the overview and setup pages, the teacher moves and slide numbers in the pacing guide, the grading suggestions, the Logic quick reference, the Rules page (the three conventions drawn, plus six rule cards for your Easier variation), the worked example (an invented 50-second piece and artist statement on paper, not audio), the Concept sheet, Sound log, Build plan and Statement planner, the vocabulary page, the presentation planner and the intro deck. None of these adds a requirement or a rubric row. The one addition that asks something of students is the Reflection page (page 22), explained under Wording changes; the rubric is unchanged.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

ANTI-MUSIC MANIFESTO

Logic quick reference

SETUP

Teacher + student

Where to find the tools this project uses. Demonstrate them on Class 2 (slide 10) and then let students work. Names are from current Logic Pro versions; check the labels on yours.

Record audio	Add an Audio track (Track › New Audio Track), choose the input, arm the track and press Record (R). Use the computer's built-in microphone, or any microphone you have.
Make a sound in Logic	Add a Software Instrument track and play or draw notes, or open an Apple loop, then change it. Any sound can be a starting point.
Reverse	Select an audio region and tick Reverse in the Region inspector, or reverse it in the Audio File Editor. Reverse it again to hear the original.
Speed and pitch	Use the Region inspector's Transpose and Fine Tuning, or turn on Flex and drag the region's ends to stretch it. Extreme values are welcome here.
Distortion	Insert a distortion effect on the channel strip (Overdrive, Distortion, Bitcrusher or Clip Distortion), then raise its drive. Listen with the volume low first.
Delay and reverb	Insert a delay (Echo or Delay Designer) and raise the feedback until it smears. Reverb: ChromaVerb or Space Designer.
Filter	Use Channel EQ or a filter plug-in and sweep the cutoff while the sound plays. A sound that is mostly filtered away is still a sound.
Automation	Press A to show automation, choose a parameter such as an effect knob or volume, and draw changes over time. This is how a sound breaks down gradually.
Edit and cut	Split regions (Command-T), delete pieces and move them off the grid. Turn Snap off to place sounds anywhere on purpose.
Save versions	Use File › Save As… with a numbered name before each big change, so a good accident is never lost.
Bounce and zip	File › Bounce › Project or Section (Command-B), MP3 or WAV. In Finder, Control-click the .logicx and choose Compress.

VERSION NOTE

Menu names are from current Logic Pro versions; older versions may differ slightly. Logic Pro is a trademark of Apple Inc., named only to describe what the project needs. This resource is not affiliated with Apple.

ANTI-MUSIC MANIFESTO

Rules to break

RULES

Teacher + student

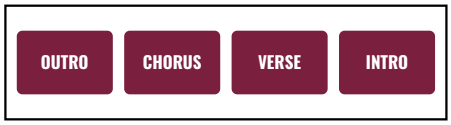

Requirement 2 is to intentionally break at least one major musical convention (structure, tonality, rhythm, etc.). Each picture shows a convention holding, then broken on purpose. Students may break any rule they can explain.

STRUCTURE

EXPECTED

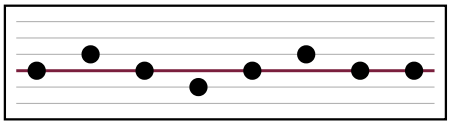

BROKEN ON PURPOSE

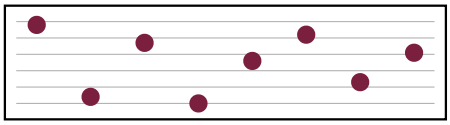

the order of the sections

TONALITY

EXPECTED

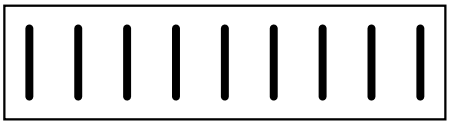

BROKEN ON PURPOSE

is there a home note?

RHYTHM

EXPECTED

BROKEN ON PURPOSE

does the pulse stay steady?

SIX RULE CARDS ·

CONVENTION	RULE CARD	FROM
Structure	The ending comes first: the sections play in reverse order.	this kit
Structure	Nothing repeats: no section, sound or pattern is used twice.	this kit
Tonality	Use only dissonant chords.	mine
Tonality	No home note: no pitch is allowed to feel like the centre.	this kit
Rhythm	Make a track with no rhythm.	mine
Rhythm	The pulse is steady, then speeds up and falls apart.	this kit

FOR MY EASIER VARIATION

My notes say to provide 3–5 specific rules and let students choose one. Cut these cards apart, or read them aloud. The two marked “mine” are my own examples from the variation; the other four were added by this kit.

INTENTION, NOT ACCIDENT

A card is only a starting point. Whatever rule a student picks, the Concept sheet asks them to say what it is and why, and the artist statement says it again to the audience.

TRY THIS BEFORE CLASS 1 ENDS

Ask students to name one convention they could break in a favorite style of music, without naming any song, and say what it would feel like to hear it broken.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

ANTI-MUSIC MANIFESTO

EXAMPLE

Worked example · an invented piece

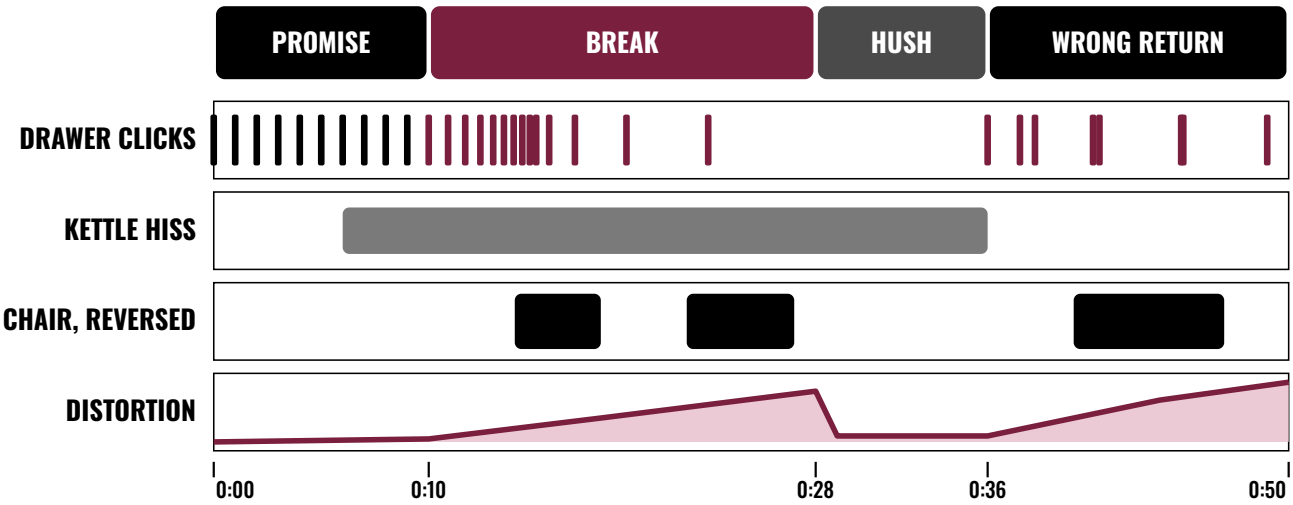

Teacher

An **invented piece, "Kitchen Table", and its artist statement, described on paper**: no audio is included, so the numbers are easy to check. Students' pieces will differ.

1 · THE CONCEPT ·

RULE BROKEN	CONCEPT	SOUNDS (RECORDED)	EFFECTS AND AUTOMATION
Rhythm: a steady pulse	A pulse is a promise; the piece breaks it, then returns it wrong	A drawer click, a kettle hiss, a chair scrape played in reverse	Distortion automated up to 85% by 0:28; delay on the clicks; hiss filtered to a whisper in the Hush

2 · THE PLAN: 50 SECONDS ·

Promise 0:00–0:10, Break 0:10–0:28, Hush 0:28–0:36, Wrong return 0:36–0:50. The plan is 50 seconds: inside my 45–60 second requirement.

3 · CHECKING THE NUMBERS

Promise: 10 clicks, each 1 s apart, which is 60 per minute. Break: 14 clicks whose gaps shrink from 0.9 s to 0.3 s, then stretch to 3.8 s. Return: 8 clicks with gaps of 0.1 s to 3.9 s, so no pulse comes back. Sections: 10 + 18 + 8 + 14 = 50 s.

4 · WHY IT IS ON PURPOSE

A listener hears a clear pulse first, so they know what is being broken. Every sound has a job: the drawer is the pulse, the kettle is the quiet, the reversed chair is the pull. The automation moves with the rule instead of being random.

5 · A SAMPLE ARTIST STATEMENT (ONE PARAGRAPH) ·

"Kitchen Table" breaks the rule that a pulse should stay steady. I recorded a drawer, a kettle and a chair, and for the first ten seconds the drawer clicks once a second like a metronome. Then I sped the clicks up and stretched them out while pushing the distortion higher, until the pulse fell apart, because I wanted the listener to feel a promise being broken. The hiss in the middle is the quiet that follows. When the clicks return they are uneven, so the piece never gets back to normal. Listen for the moment the second click arrives too early.

Name _____ Date _____

ANTI-MUSIC MANIFESTO

Digital Music Production | *Open-Ended Project* | 7 class periods

OVERVIEW ·

Break the rules on purpose. Create an intentional piece of "anti-music" — a work that deliberately defies traditional structure, tonality, or rhythm while still expressing a clear artistic concept. This isn't random noise — it's noise with a vision.

GOALS ·

- Challenge conventional ideas of what music is and can be
- Use Logic Pro to create a deliberate, expressive piece that defies expectations
- Explore unconventional sound sources, effects, and techniques
- Articulate artistic intent through a written artist statement

KEY VOCABULARY ·

Anti-Music	Art that intentionally breaks traditional musical rules while maintaining artistic purpose
Atonality	Music that avoids a tonal center or key — no "home" note
Dissonance	Sounds that feel tense, clashing, or unresolved
Deconstruction	Taking apart something familiar and reassembling it in unexpected ways
Artist Statement	A short written explanation of your creative concept and choices

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

ANTI-MUSIC MANIFESTO

STUDENT

Project sheet · requirements and steps

Name _____ Date _____

REQUIREMENTS ·

- [ ] Length: 45–60 seconds
- [ ] Intentionally break at least one major musical convention (structure, tonality, rhythm, etc.)
- [ ] Use Logic's effects and automation to distort or deconstruct sounds
- [ ] Record or create unconventional sound sources
- [ ] Write a brief artist statement (1 paragraph) explaining your approach and concept

STEPS / PROCESS ·

1. **Define your concept** — Brainstorm what "anti-music" means to you. What rule are you breaking and why? (Concept sheet: page 12)
2. **Gather sounds** — Record or create unconventional sound sources (Sound log: page 13)
3. **Build** — Use Logic to construct your piece. Lean into effects, automation, and distortion. (Build plan: page 14)
4. **Shape** — Even though you're breaking rules, your piece should feel intentional, not accidental. (Build plan: page 14)
5. **Write your artist statement** — Explain what you did and why (Statement planner: page 15)
6. **Finalize** — Mix, bounce, and prepare to present your concept to the class
7. **Present & Get Feedback** — Create your own Padlet post with 3 questions you want classmates to answer about your project. Present to the class. During classmates' presentations, answer at least 2 of their 3 questions on their Padlet post.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

ANTI-MUSIC MANIFESTO

STUDENT

Project sheet · tips and checklist

Name _____ Date _____

TIPS FOR SUCCESS ·

- The difference between anti-music and random noise is intention. Know what rule you're breaking and why.
- Listen to experimental artists for inspiration: John Cage, Merzbow, Aphex Twin, Death Grips.
- Don't be afraid to make something uncomfortable. That might be the point.
- Your artist statement is just as important as the music. It tells your audience what to listen for.

SUBMISSION CHECKLIST ·

- ☐ Bounced .mp3 or .wav uploaded to your class page
- ☐ Zipped .logicx project file uploaded to your class page
- ☐ Files named correctly: "Your Name – Anti-Music Manifesto"
- ☐ Artist statement submitted via your class page
- ☐ Padlet post created with your 3 feedback questions
- ☐ Answered at least 2 questions on classmates' Padlet posts during presentations

NOTES ·

ANTI-MUSIC MANIFESTO

Rubric

RUBRIC

/ 25

Name _____ Date _____

GRADING RUBRIC /25

Anti-Music Manifesto | Open-Ended Project

Each category is scored 1–5. Your final grade is the average of your self-score and your teacher's score.

Category	1	2	3	4	5
CREATIVITY & ORIGINALITY	Minimal creative effort; relies on defaults or clichés	Some creative ideas but largely predictable	Shows originality; experiments with sound or style	Highly creative; unique approach with clear artistic intent	Exceptional creativity; innovative, bold, and expressive
TECHNICAL SKILL / DAW USE	Limited understanding of Logic Pro tools	Basic tool use with frequent errors	Competent workflow; uses tools correctly	Advanced use of Logic features and shortcuts	Expert-level command of multiple Logic systems
COMPOSITION & STRUCTURE	Disorganized; no clear form or direction	Some structure present but underdeveloped	Clear, cohesive form with logical sections	Engaging structure with dynamic progression	Professional pacing, flow, and musical arc
SOUND DESIGN & MIX QUALITY	Poor sound choices; unbalanced or muddy mix	Some variety but inconsistent levels and EQ	Good sound selection; mostly balanced mix	Strong sound palette; clean, well-balanced mix	Exceptional sound design; professional-quality mix
DOCUMENTATION & PRESENTATION	Missing or incomplete; no reflection	Minimal documentation with little insight	Satisfactory; provides basic detail and reflection	Well-documented; clear and thoughtful reflection	Exceptional; thorough insight and polished delivery

Student Score: _____ / 25	Teacher Score: _____ / 25
Final Grade = Average of Student + Teacher = _____ / 25

ANTI-MUSIC MANIFESTO

Present and get feedback

STUDENT

Classes 6–7

Name _____ Date _____

FROM YOUR PROJECT SHEET, STEP 7

Present & Get Feedback — Create your own Padlet post with 3 questions you want classmates to answer about your project. Present to the class. During classmates' presentations, answer at least 2 of their 3 questions on their Padlet post.

MY THREE FEEDBACK QUESTIONS ·

Ask about things you really want to know, not yes-or-no questions.

Question 1: _____

Question 2: _____

Question 3: _____

CLASSMATES' QUESTIONS I ANSWERED (AT LEAST 2) ·

CLASSMATE	THEIR QUESTION	MY ANSWER

BEFORE I PRESENT ·

- ☐ Files named "Your Name – Anti-Music Manifesto"; .mp3 or .wav, zipped .logicx and artist statement submitted
- ☐ Padlet post created with my 3 questions
- ☐ Rubric self-score done (page 19)

After presenting

Name _____ Date _____

WHAT A REFLECTION IS

A reflection is a written or oral conversation about how you did on the project and what you would do differently next time. Answer all four prompts in your own words. You choose how.

☐ **Written.** I will write my answers on this page.

☐ **Oral.** I will talk my answers through with my teacher. My teacher fills in the box at the bottom.

1 What went well? Name something in your project you are proud of, and say why it worked.

2 What did you struggle with? Say what was hard and what you tried to fix it.

3 What would you do differently next time? Be specific: a step, a choice, a sound or a tool.

4 Look at the rubric (page 19). Which category are you proudest of, and which would you work on first next time?

ORAL REFLECTION · TEACHER

Date: _____ **Prompts covered (1-4):** _____

Key points I heard: _____

TERMS OF USE

Thank you for your purchase!

© 2026 Brian Lotze. Hudson Beat by Brian Lotze. All rights reserved. This purchase gives **one teacher** a license to use this resource (the PDF and the intro deck) with their own students.

YOU MAY

- Print and copy pages for your own classroom and students, year after year.
- Present the intro deck to your own classes and edit it for your own teaching.
- Share pages with your own students through a password-protected class site or learning platform.
- Leave the pages for a substitute teacher who teaches your own students.

YOU MAY NOT

- Share, email or copy this resource for other teachers, a whole school or a district. Additional licenses are available on Teachers Pay Teachers.
- Post any part of it on a public website, shared drive or social media.
- Sell, give away or claim any part of it as your own, or edit it into a new product.

QUESTIONS?

Please use the Q&A tab on the Hudson Beat by Brian Lotze store on Teachers Pay Teachers. If something looks wrong, let me know there and I will fix it.

CREDITS

- Project sheet, rubric, teacher notes and intro deck: original work by Brian Lotze, Hudson Beat.
- Worked example (an invented 50-second piece and artist statement, described on paper), the three-conventions, sound-chain and timeline drawings and layouts: original work, Hudson Beat.
- No audio, video, lyrics, album art, screenshots, presets or chart data are included. The three suggested resources and the four artists in tip 2 are named exactly as the teacher listed them, with no link or content; YouTube is not affiliated with or endorsing this resource. Padlet is named only as an example of a tool you may already use.
