CHOP, PITCH AND FLIP A SAMPLE

SAMPLE FLIPPING

DMP2 · Quick Sampler · chopping · drum programming · mixing · intro slides

GRADES 9–12 · 7 CLASS PERIODS · 21 PAGES + 17-SLIDE DECK

SAMPLE FLIPPING

How to use this resource

START HERE

Teacher

WHAT THIS IS ·

A 7-class-period project for high school music technology. Each student takes one sample and flips it into an original track in Logic Pro: they chop, pitch, reverse and rearrange it in Quick Sampler, program their own drums, layer instruments and mix. It is an open-ended project from my Digital Music Production 2 course (focus: sampling and Quick Sampler), and the projects in that course can be taught in any order.

QUICK START ·

1. Read the pacing guide (page 6) and my teacher notes (pages 7–8).
2. Build your cleared sample set (page 4): no samples are included.
3. Print the student pages (pages 12–20), one set per student.
4. Open the intro deck and read the speaker notes for Class 1.

THE INTRO DECK ·

Every slide has a class: Class 1 (slides 1–6), Class 2 (slides 7–10), Class 3 (slide 11), Class 4 (slide 12), Class 6 (slides 13–15) and Class 7 (slides 16–17). Class 5 is a working day with no new slide. Every slide has speaker notes.

Fonts: the deck uses Oswald and Source Sans 3 (free on Google Fonts, built into Google Slides). If PowerPoint or Keynote shows a different font, install the two fonts or present the PDF copy, which shows the intended look.

IN ONE SENTENCE

Students pick a cleared sample, chop and pitch it in Quick Sampler, build their own drums around it, layer, mix and present.

WHAT'S INSIDE ·

PART	PAGES	USE
Teacher pages	pages 2–11	How to use, overview, sample set, ethics, pacing, teacher notes, what changed, Logic reference, worked example
Student pages	pages 12–20	Sample log, Chop map, drum plan, project sheet (3 pages), rubric, vocabulary, feedback planner
Intro deck (separate file)	deck	17 slides, .pptx + PDF, speaker notes on every slide

NO SAMPLES INCLUDED

No samples, audio, video, lyrics or songs are included. You supply your own cleared sample set (page 4), so you know exactly where every sound came from.

MAKE IT FIT YOUR CLASS ·

- **Your sample set:** 10 to 50 short sounds you have cleared. I use 50; a smaller set works, and so does one sound per pair of students.
- **Easier or harder:** my variations on page 7.
- **Feedback board:** my sheets use Padlet for the three questions; any class board works.
- **Grading:** my rubric, /25, the average of the student's and your score (page 18).

SAMPLE FLIPPING

Project overview

OVERVIEW

DMP2 · Open-Ended

FROM MY DMP2 PROJECT MENU

Sample Flipping · Open-Ended · Sampling & Quick Sampler

Transform a provided sample into an original track using Logic's Quick Sampler. Chop, pitch, flip, and build.

WHAT STUDENTS MAKE ·

One Logic Pro project: an original track built around one sample. The sample is chopped, pitched, reversed or stretched in Quick Sampler, set against drum patterns the student programmed, layered with instruments that fit the style, and mixed with EQ and plug-ins. They hand in a bounced .mp3 or .wav, the zipped .logicx project, and a Padlet post with three feedback questions.

WHAT THIS PROJECT REINFORCES ·

Builds Quick Sampler proficiency, drum programming, and creative transformation skills. Natural entry point for discussing sampling ethics and copyright.

STANDARDS ·

Supports the National Core Arts Standards for Music (Music Technology, high school): developing and refining original work (MU:Cr2.1, MU:Cr3.1), presenting it (MU:Pr6.1) and responding to it (MU:Re7.2).

GOALS ·

- Learn to use Quick Sampler for creative sample manipulation
- Understand the art and ethics of sample-based production
- Develop drum programming skills with self-created patterns
- Build a complete, original track from a single source sample

AT A GLANCE ·

Grades	9–12: the second-year course, after a first year of Logic Pro basics
Length	7 class periods: choose and demo, build, three working days, mix, present
Software	Logic Pro: Quick Sampler (Classic, One Shot, Slice), Drum Machine Designer and the Step Sequencer, Channel EQ, pan, bounce
You supply	A set of cleared samples, headphones, a feedback board
Assessment	My rubric, 5 categories scored 1–5, /25; final grade = average of the student's and the teacher's score (page 18)

BEFORE THEY START

Students should already know how to make a drum pattern, play in parts and save, bounce and zip a project in Logic. The Logic quick reference (page 10) covers every tool this project uses.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

SAMPLE FLIPPING

Setup and your cleared sample set

SETUP

Teacher

YOU NEED ·

- **A Mac with Logic Pro** for each student (a current version; Quick Sampler and the Step Sequencer need Logic Pro 10.5 or later), and **headphones**.
- **A set of cleared samples**: short audio files (a few seconds each) your students may use. Nothing is included. Build it from the options on the right.
- **A place to share the set** with your students and to submit an .mp3 or .wav and a zipped .logicx project (your class page).
- **A feedback board** for the three questions (my sheets use Padlet).
- **Printed student pages**, one set each (pages 12–20).

BEFORE CLASS 1 ·

- [ ] Build and test the sample set; write each sample's source and license in a list for yourself.
- [ ] Name each file with its key and tempo where you know them (for example Warm Pad_keyAmin_90bpm).
- [ ] Make a 30-second flip of one sample for slide 2.
- [ ] Print the student pages; set up the submission spot and the feedback board.

RECORD YOUR OWN. ·

My class set is 50 short vocal loops and phrases, and it is not part of this kit. A sample is someone's recording, so use sounds you have the right to hand to students:

- **Record your own.** You, your colleagues or willing students sing, play or tap short phrases into Logic. The performers agree to class use.
- **Public domain and CC0 sounds.** Sound libraries label these. Save the page that shows the license.
- **Licensed libraries.** If your school or department owns a sample library, read its license: does it allow classroom use and student remixes?
- **Logic's own sounds.** Apple Loops that come with Logic are meant for making music; read Apple's license before you hand a set out.

A CLEARED SAMPLE IS…

- One whose source and license you can name
- Short (2 to 12 seconds) and clean, with one clear idea to chop
- Free of any famous recording or song

POSTING ONLINE?

A class assignment kept on your class page is one thing; posting a flip publicly is another. Check each license first, and credit the source if it asks.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

SAMPLE FLIPPING

Sampling, ethics and copyright

TEACHER

Class 1

My teacher notes call this project “a natural entry point for discussing sampling ethics and copyright.” This page gives you the facts to start with and questions for Class 1. It is a discussion starter, **not legal advice**.

FOUR IDEAS FOR STUDENTS ·

- **Two kinds of ownership.** A recorded song generally carries two sets of rights: the recording itself and the music and words underneath it. Using a piece of someone’s record in a new track usually means asking about both.
- **Clearing a sample** means getting permission, often for a fee or a share of the earnings.
- **Some sounds are free to use.** Recordings you make yourself, public-domain sounds and CC0 sounds need no permission. Some licenses ask you to credit the source.
- **Transforming is not the same as clearing.** Chopping and pitching a sample makes it sound different; it does not make it yours.

WHY THIS CLASS USES CLEARED SAMPLES ·

Every student can flip freely because the set was chosen so that nobody has to ask permission. The Sample log (page 12) asks where the sample came from, so the habit sticks.

DISCUSSION QUESTIONS ·

1. Why would a producer build a track from someone else’s sound instead of recording a new one?
2. The artist made the original recording. What does the producer owe them?
3. When does a flip become a new work, and when is it still the original?
4. Would you feel differently if the sample was a stranger’s voice, a friend’s, or yours?
5. A producer flips a sample so much that nobody could recognize it. Do they still need permission?
6. What would you want if someone sampled your music?

CLASS 1 IN TWO MINUTES

Pick two questions, take answers aloud, then tell students: our samples are cleared, and I would like you to write down where yours came from.

IS IT CLEARED? A FIVE-MINUTE SORT ·

Read each source aloud and have students vote: use it, or ask first?

THE SOUND COMES FROM…	USE IT?	WHY
A phrase you recorded yourself	**Yes**	You own it. Check that anyone performing agrees.
A sound labelled public domain or CC0	**Yes**	The owner has given up the rights; keep the license page.
A sound whose license asks for credit	**Yes, with credit**	Follow the license and name the source.
A few seconds of a song from a streaming service	**Ask first**	It is someone’s recording and someone’s song.
A clip pulled from a video or a game	**Ask first**	Same rules; it may have several owners.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

SAMPLE FLIPPING

Pacing guide · 7 class periods

PACING

Teacher

7 class periods, as on my project menu. The “My plan” column is my day-by-day pacing guide as I wrote it; the other columns show what to put on the screen and in students’ hands.

CLASS	MY PLAN	TEACHER MOVES	DECK	STUDENT PAGES
CLASS 1	**Class 1:** Introduction to sample flipping and Quick Sampler demo. Select sample.	Slides 1–6: hook (before and after), what flipping is, sampling ethics, the seven classes, step 1. Hand out the project sheet and the Sample log.	Slides 1–6	p. 12, p. 15, p. 16, p. 17, p. 19
CLASS 2	**Class 2:** Deep dive into Quick Sampler manipulation. Begin building.	Slides 7–10: slice a sample, the three Quick Sampler modes, a flip, drums that fit. Demo Classic, One Shot and Slice before students start.	Slides 7–10	p. 13, p. 14
CLASS 3	**Classes 3–5:** Working days — build track, layer instruments, refine.	Slide 11: build the beat and the chops. Then work time; circulate.	Slide 11	—
CLASS 4		Slide 12: layer and arrange (bass, chords, melodies). Then work time.	Slide 12	—
CLASS 5		Full working day: refine the track. Ask each student to play the raw sample, then the track.	No new slides	—
CLASS 6	**Class 6:** Final mix, bounce. Prepare presentations.	Slides 13–15: mix and bounce, what you turn in, the rubric. Students self-score, bounce and post their three questions.	Slides 13–15	p. 18, p. 20
CLASS 7	**Class 7:** Presentations with Padlet Q&A peer feedback.	Slides 16–17: presentation day and the close. Every student presents and answers 2 of each classmate’s questions.	Slides 16–17	p. 20

THE ONE RULE FOR CLASS 2

From my common struggles: demo Classic, One Shot and Slice early. Slide 8 is that demo, and the Logic reference (page 10) is the handout.

CLASSES 3–5

Working days. Slides 11 and 12 open Classes 3 and 4; Class 5 has no new slide. Circulate and ask: what did you do to the sample, and could I hear the original in your track?

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

SAMPLE FLIPPING

WHAT THIS PROJECT REINFORCES ·

Builds Quick Sampler proficiency, drum programming, and creative transformation skills. Natural entry point for discussing sampling ethics and copyright.

COMMON STUDENT STRUGGLES ·

- Students use the sample without transforming it — push them to actually chop, pitch, or manipulate.
- Quick Sampler modes are confusing. Demo Classic, One Shot, and Slice modes early.
- Drums feel generic or disconnected from the sample.
- Students give up quickly if the sample doesn't immediately sound cool.

SUGGESTED VARIATIONS ·

Easier: Pre-slice a few samples and provide them as ready-to-play Quick Sampler instruments.

More Advanced: Require 2 samples in the same track, or multiple Quick Sampler instruments from a single source.

WHERE THIS KIT HELPS WITH EACH STRUGGLE

- Using the sample without transforming it: the Chop map (page 13) makes students plan their cuts and their flip, and the worked example (page 11) shows chop, reverse and pitch.
- Confusing modes: slide 8 and the Logic reference (page 10).
- Generic drums: slide 10 and the drum plan (page 14), which asks where the chop lands.
- Giving up early: the Sample log (page 12) has students try several samples first.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

SAMPLE FLIPPING

Teacher notes · resources, grading, notes

TEACHER NOTES

SUGGESTED RESOURCES ·

MY LIST	IN THIS KIT
Quick Sampler — Turn Any Sound into an Instrument (YouTube)	Not included: it is a video on YouTube, so search it by title. Slides 8 and 9 and the Logic reference (page 10) cover the same ground.
Advanced Quick Sampler Techniques (YouTube)	Not included: search it by title. The worked example (page 11) shows the chop, reverse and pitch moves on paper.
50 provided samples (on your class page)	Not included. Page 4 shows how to build a set of your own cleared samples, and page 5 helps you talk about where they came from.

HOW TO GRADE ·

- My rubric: five categories, each scored 1–5, /25 (page 18). Students score themselves first; the final grade is the average of their score and yours.

Suggestions from this kit, not part of my rubric:

- Technical Skill: ask the student to open Quick Sampler and show the mode they used and one thing they did to the sample (a chop, a reverse, a pitch change).
- Creativity: play the raw sample, then the track. Can you hear what changed, and did the student make something new around it?
- Documentation & Presentation: the Sample log (page 12) and the three Padlet questions are the evidence. My rubric mentions reflection, so you may want to ask for a sentence or two.

NOTES / OBSERVATIONS ·

Usually one of the most popular projects.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

SAMPLE FLIPPING

What changed from the original

CHANGES

Teacher

This kit is built from three of my documents: the **Project Sheet & Rubric**, the **Teacher Notes** and the **Sample Flipping** entry on my DMP2 project menu. This page lists every change to my wording, so you know exactly what is mine and what was added.

WORDING CHANGES ·

- My LMS name is written as “your class page” (checklist items 1 and 2, and the sample-set line in my resource list).
- This kit includes no samples. Requirement 1 reads “from the provided options (my class set has 50; page 4 shows how to build yours)” instead of “from the 50 provided options”, and my resource “50 provided samples” points to page 4.
- Page numbers are added to steps 1–3 (the Sample log, the Logic reference and the drum plan).
- My two YouTube resources are named by title only; the videos are not included.
- My pacing guide’s “Classes 3–5” row spans the Class 3, 4 and 5 rows, so each class can name its slides.
- Layout only: the rubric’s Name and Date lines moved to the top; its Notes box became ruled lines.
- The intro deck shortens my wording (full wording on pages 15–17): slide 8 shortens the three Quick Sampler modes from my struggle list, and slides 11, 12 and 13 shorten steps 3 to 6 into short lines.

KEPT AS I WROTE IT ·

Everything else from my three documents is kept as I wrote it: the overview, goals, vocabulary, requirements 2 to 6, steps, tips, checklist and file name (“Your Name – Sample Flipping”), the rubric (five categories scored 1–5, /25, the average of the student’s and the teacher’s score), what the project reinforces, the four common struggles, the variations, my day-by-day pacing and my closing note, and the project menu entry quoted on page 3. No requirement or rubric row is added.

NEW IN THIS KIT ·

Everything else is new and supports my sheets without changing them: how to use the kit, the overview and setup pages (including how to build a cleared sample set), the sampling ethics page, the teacher moves and slide numbers in the pacing guide, the grading suggestions, the Logic quick reference, the worked example (an original practice sample described on paper, not a recording), the Sample log, the Chop map, the drum plan, the vocabulary page, the presentation planner and the intro deck. None of these adds a requirement or a rubric row.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

SAMPLE FLIPPING

Logic quick reference

SETUP

Teacher + student

Everything students need in Logic for this project, in one table. Demonstrate the three modes (slide 8) and the drums (slide 10), then let students work. Names are from current Logic Pro versions.

Make a Quick Sampler	Track › New Software Instrument Track. In the Library (Y), click the instrument slot and choose Quick Sampler (under Sampler).
Load a sample	Drag the audio file from Finder onto the Quick Sampler's waveform area. The sample appears as a waveform; play the keys to hear it.
Classic mode	The sample plays across the keyboard like a sampler: the key you play changes the pitch, and the pitch changes the speed. Good for melodies and bass.
One Shot mode	A key plays the whole sample from start to end, however long you hold it. Good for hits, stabs and single sounds.
Slice mode	The sample is cut into slices and each slice goes to its own key. Move or add slice markers on the waveform so each cut starts at the beginning of a sound.
Reverse and pitch	Use the Reverse button for the sample or a slice, and the pitch control to move it up or down in semitones (12 = one octave).
Record the chops	Record-enable the track and play the slices from a keyboard, or draw notes in the Piano Roll. Quantize if you want them tight.
Drums	New Software Instrument Track, Electronic Drum Kit (Drum Machine Designer). Control-click in the track, Create Pattern Region, double-click to open the Step Sequencer.
EQ, pan, bounce	Mixer (X): double-click the EQ display for Channel EQ; turn the Pan knob. File › Bounce › Project or Section (Command-B), MP3 or WAV. In Finder, Control-click the .logicx and choose Compress.

VERSION NOTE

Menu names are from current Logic Pro versions; older versions may differ slightly. Logic Pro is a trademark of Apple Inc., named only to describe what the project needs. This resource is not affiliated with Apple.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

SAMPLE FLIPPING

EXAMPLE

Worked example · a practice sample

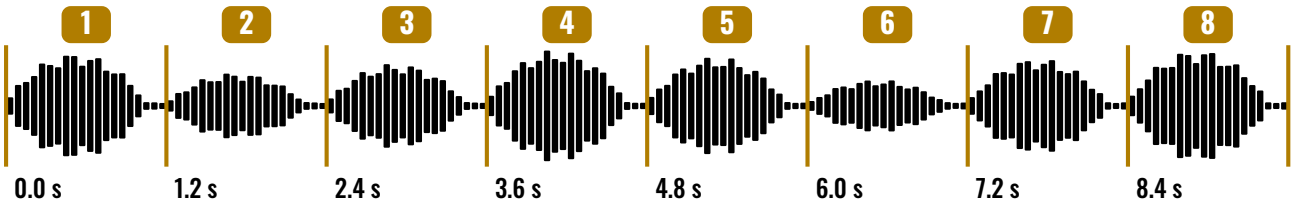

Teacher

An **original practice sample, described on paper**: no audio is included, so these numbers are easy to check. Students' samples will differ.

1 · TIME

At 100 BPM one beat is 0.6 s and one bar is 2.4 s. The sample lasts 9.6 s = 4 bars = 8 slices of 2 beats (1.2 s).

2 · SLICE IT ·

3 · FLIP IT ·

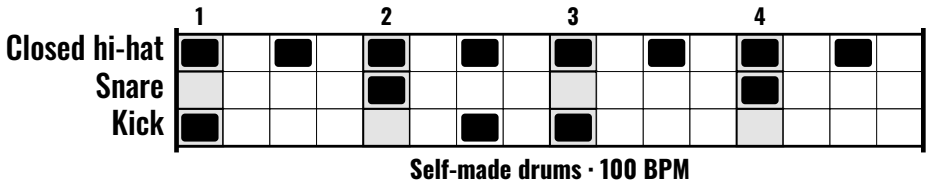

SLICE	PLAYS	SOUNDS LIKE (IMAGINED)
1	0.0 s – 1.2 s	Long soft "ah" that swells
2	1.2 s – 2.4 s	A breath
3	2.4 s – 3.6 s	Short bright "hey"
4	3.6 s – 4.8 s	Low hummed note
5	4.8 s – 6.0 s	Two quick syllables
6	6.0 s – 7.2 s	Held high note
7	7.2 s – 8.4 s	Rising slide
8	8.4 s – 9.6 s	Short low stab

SLOT	SLICE	WHAT HAPPENS	STARTS
1	1	as recorded	0.0 s
2	1	as recorded	1.2 s
3	4	as recorded	2.4 s
4	2	reversed	3.6 s
5	6	as recorded	4.8 s
6	3	reversed	6.0 s
7	5	as recorded	7.2 s
8	8	down an octave	8.4 s

In Classic mode, pitching down 12 semitones plays at half speed, so slice 8 (1.2 s) lasts 2.4 s: exactly one bar.

4 · DRUMS (X = A HIT, . = A REST, 16 STEPS PER BAR) ·

Self-made drums · 100 BPM

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

Name _____ Date _____

SAMPLE FLIPPING

Digital Music Production | *Open-Ended Project* | 7 class periods

OVERVIEW ·

Take one of the provided samples and flip it into something entirely your own. Using Logic's Quick Sampler, you'll chop, stretch, pitch, and manipulate the sample to build an original track around it. This is how some of the biggest producers in hip-hop, R&B, and electronic music work.

GOALS ·

- Learn to use Quick Sampler for creative sample manipulation
- Understand the art and ethics of sample-based production
- Develop drum programming skills with self-created patterns
- Build a complete, original track from a single source sample

KEY VOCABULARY ·

Sample	A recorded piece of audio used as raw material in a new composition
Quick Sampler	A Logic Pro instrument that lets you import, slice, and play back audio samples
Flipping	Transforming a sample into something new through chopping, pitching, or reversing
Chopping	Cutting a sample into smaller pieces to rearrange and replay

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

SAMPLE FLIPPING

STUDENT

Project sheet · requirements and steps

Name _____ Date _____

REQUIREMENTS ·

- ☐ Choose one sample from the provided options (my class set has 50; page 4 shows how to build yours)
- ☐ Use Quick Sampler to manipulate and transform the sample
- ☐ Key and tempo are up to you — make sure they fit the sample
- ☐ Drum patterns must be self-created
- ☐ Use layers appropriate to the style
- ☐ Apply EQ and plug-ins to polish your mix

STEPS / PROCESS ·

1. **Listen and choose** — Browse the provided samples and select one (log your choices on page 12)
2. **Learn Quick Sampler** — Import your sample and experiment with slicing, pitching, and playback modes (reference: page 10)
3. **Build your beat** — Program your own drum pattern that fits the style (page 14)
4. **Layer and arrange** — Add bass, chords, melodies, and additional elements
5. **Mix** — EQ, pan, and balance everything
6. **Finalize** — Bounce your track and prepare your presentation
7. **Present & Get Feedback** — Create your own Padlet post with 3 questions you want classmates to answer about your project. Present to the class. During classmates' presentations, answer at least 2 of their 3 questions on their Padlet post.

© 2026 Brian Lotze · Hudson Beat · For single-classroom use

SAMPLE FLIPPING

STUDENT

Project sheet · tips and checklist

Name _____ Date _____

TIPS FOR SUCCESS ·

- Spend real time experimenting in Quick Sampler before building the full track.
- Try reversing, pitching down, or isolating just one small section of the sample.
- Your drums set the tone. Match the drum style to whatever genre your flip is heading toward.
- Listen to classic sample-based producers (J Dilla, Kanye, Madlib) for inspiration.

SUBMISSION CHECKLIST ·

- ☐ Bounced .mp3 or .wav uploaded to your class page
- ☐ Zipped .logicx project file uploaded to your class page
- ☐ Files named correctly: “Your Name – Sample Flipping”
- ☐ Padlet post created with your 3 feedback questions
- ☐ Answered at least 2 questions on classmates’ Padlet posts during presentations

NOTES ·

Rubric

RUBRIC

/ 25

Name _____ Date _____

GRADING RUBRIC /25

Sample Flipping | Open-Ended Project

Each category is scored 1–5. Your final grade is the average of your self-score and your teacher's score.

Category	1	2	3	4	5
CREATIVITY & ORIGINALITY	Minimal creative effort; relies on defaults or clichés	Some creative ideas but largely predictable	Shows originality; experiments with sound or style	Highly creative; unique approach with clear artistic intent	Exceptional creativity; innovative, bold, and expressive
TECHNICAL SKILL / DAW USE	Limited understanding of Logic Pro tools	Basic tool use with frequent errors	Competent workflow; uses tools correctly	Advanced use of Logic features and shortcuts	Expert-level command of multiple Logic systems
COMPOSITION & STRUCTURE	Disorganized; no clear form or direction	Some structure present but underdeveloped	Clear, cohesive form with logical sections	Engaging structure with dynamic progression	Professional pacing, flow, and musical arc
SOUND DESIGN & MIX QUALITY	Poor sound choices; unbalanced or muddy mix	Some variety but inconsistent levels and EQ	Good sound selection; mostly balanced mix	Strong sound palette; clean, well-balanced mix	Exceptional sound design; professional-quality mix
DOCUMENTATION & PRESENTATION	Missing or incomplete; no reflection	Minimal documentation with little insight	Satisfactory; provides basic detail and reflection	Well-documented; clear and thoughtful reflection	Exceptional; thorough insight and polished delivery

Student Score: _____ / 25	Teacher Score: _____ / 25
Final Grade = Average of Student + Teacher = _____ / 25

TERMS OF USE

Thank you for your purchase!

© 2026 Brian Lotze. Hudson Beat by Brian Lotze. All rights reserved. This purchase gives **one teacher** a license to use this resource (the PDF and the intro deck) with their own students.

YOU MAY

- Print and copy pages for your own classroom and students, year after year.
- Present the intro deck to your own classes and edit it for your own teaching.
- Share pages with your own students through a password-protected class site or learning platform.
- Leave the pages for a substitute teacher who teaches your own students.

YOU MAY NOT

- Share, email or copy this resource for other teachers, a whole school or a district. Additional licenses are available on Teachers Pay Teachers.
- Post any part of it on a public website, shared drive or social media.
- Sell, give away or claim any part of it as your own, or edit it into a new product.

QUESTIONS?

Please use the Q&A tab on the Hudson Beat by Brian Lotze store on Teachers Pay Teachers. If something looks wrong, let me know there and I will fix it.
